## Information Only

### **Elections for Winter Capacity Interconnection Rights (CIRs) 2022/2023**

To further support resource aggregation for which the PJM Tariff already provides, PJM is pursuing formation of a long term process for winter Capacity Interconnection Rights ("CIRs") that would be incorporated in the New Services Queue which will be discussed at the Planning Committee. Pending formation of a final process PJM established in 2016 through Docket No. ER17-367, a process for a year by year transitional period during which intermittent resources and environmentally limited generation resources may request additional winter CIRs. This transitional study period is being continued for an additional year pending completion of those discussions held at the Planning Committee. This transitional study would be a study to make additional capability available for only the 2022/2023 Delivery Year and is the same as PJM used during the first year for the 2020/2021 Delivery Year.

Generation Owners of Intermittent Resources and Environmentally Limited Resources which seek to obtain additional Capacity Interconnection Rights related to the winter period (defined as November through April of a Delivery Year) for the purposes of aggregation under the Tariff, Attachment DD, must submit the following

information to be eligible for this study:

- Resource name
- Location (e.g. substation name)
- Queue Number
- Company
- Generation type (intermittent or Environmentally Limited Generation Resource)
- Total amount of CIR (MW) being requested (CIR amount = current CIR + incremental CIR for this transitional study)

The projects will be queued in the order the request has been received for allocating Winter CIRs based on the available transmission capability.

**PJM will start to accept requests starting Friday August 31, 2018. All requests must be submitted no later than Wednesday, October 31, 2018 by 5:00PM Eastern Time. Please submit this information to [TransitionalCIRrequests@pjm.com](mailto:TransitionalCIRrequests@pjm.com).** If you have any questions regarding this communication, please contact [TransitionalCIRrequests@pjm.com](mailto:TransitionalCIRrequests@pjm.com).

### **FERC Order 845 Compliance Requirements**

PJM hosted a Special Planning Committee meeting on August 20 to review potential changes to PJM Manuals and the OATT to meet compliance with FERC Order 845. PJM assessed that seven of the ten reforms will result in minimal changes to the Interconnection Process. The remaining three (Option to Build, Reporting Requirements, and Surplus Interconnection Service) will require extensive changes including new processes. PJM will host a follow up session on September 21.
