

Performance Impact of multi-schedule model in Market Clearing Engine (MCE) in nGEM Enhanced Combined Cycle (ECC) and Energy Storage Resource (ESR) models Monthly Progress Report

5/22/23

1. [Performance Impact of multi-schedule model in Market Clearing Engine \(MCE\) in nGEM Enhanced Combined Cycle \(ECC\) and Energy Storage Resource \(ESR\) models](#)

Issue Status

The Performance Impact of the Multi-schedule model in the MCE will be reviewing packages at its next special session on May 24.

Target Completion

August 2023

Progress Update

The first two special sessions reviewed education on status quo, and solicited interests, design components, and solution options. The remaining special sessions on 5/24 and 6/27 will review and hone packages for a first read at the MIC on July 12.

Action Requested (if necessary)

Stakeholders should provide packages in advance of the May 24 meeting.
