

Reliability Limited Generator Compensation Task Force Proposal

Heather Reiter

Senior Engineer, Transmission Operations

January 31, 2013

10/4/2011

- Problem/Opportunity Statement presented
- Governing Agreements lacked clear definition of reliability limits and compensation methodology

2/17/2012

- Reliability Limited Generator Compensation Task Force (RLGCTF) created by MIC
- Education on certain Stability Limitations
- Consider Tariff, Operating Agreement, and manual changes

7/11/2012

- Charter approved
- 12 total meetings of the RLGCTF

NOTE: Issues discussed represent less than 1% of all outages within PJM during the past 5 years.

At what level should Lost Opportunity Cost be compensated?

Generators will be paid Lost Opportunity Cost to the lesser of the Economic Maximum or Maximum Facility Output

PJM Action Items:

- [Current PJM Process for Handling Stability Issues](#)
- An update on stability outages will be provided in the MIC update when applicable

- Section 1.3.2A.01
 - Clarifying language for Economic Minimum definition
 - Added Economic Maximum definition
- Added new section 3.1.1 Settlements
- Section 3.2.3 Operating Reserves and Section 3.2.3B
 - Added Lost Opportunity Cost shall be limited to the lesser of the units Economic Maximum or the units Maximum Facility Output
