

Special MRC - CIRs for ELCC Resources Page Turn for Package I

CBIR Matrix with Solution Packages: [Solution Packages](#)

Summary Table for Package I Redlines

Design Component	Governing Document Sections	PJM Manual Sections
CIR Request Policy	-	<p>Manual 21 Section 1.1.1 Attaining CIRs Clarify CIR request policy for Unlimited Resources</p> <p>Manual 21A Section 4.1 Attaining CIRs (new section) CIR request policy for ELCC Resources</p>
CIR Verification, Testing, and Retention Policy	-	<p>Manual 21A Section 4.2 Retaining CIRs (new section) CIR retention rules for ELCC Resources</p> <p>Section 7 Testing (new section) Describes the verification / testing requirements for ELCC Resources</p>
CIRs in ELCC Methodology and AUCAP Calculations	<p>Reliability Assurance Agreement (RAA) Definitions Update to reflect capping of Effective Nameplate Capacity (ENC) at CIRs for Limited Duration Resources</p> <p>Schedule 9.1 Section F Calculation of Accredited UCAP and ELCC Resource Performance Adjustment Updates to reflect historical curtailment adjustments and capping of output in determining the performance adjustment</p> <p>Schedule 9.1 Section H Details of the Effective Load Carrying Capability Methodology Updates to reflect historical curtailment adjustments and capping of output in the ELCC analysis.</p>	<p>Manual 20 Section 5.3 Resource Performance Updates to historical curtailment adjustments and capping of output in the ELCC analysis.</p> <p>Manual 21A Section 1.2 General Approach to Calculation of Accredited UCAP Update to ENC definition consistent with RAA</p> <p>Section 3.2 Calculation of ELCC Resource Performance Adj. Changes in calculation of Performance Adjustment for Variable/Hybrid resources</p> <p>Section 5.3 Parameters for Limited Duration Resources (which Includes Energy Storage Resources) Update to reflect CIR cap on ENC for Limited Duration Resources</p>

	<p>Schedule 9.1 Section I Methodology to Simulate Output of Certain Resources in the Effective Load Carrying Capability Model Updates to reflect capping of output in analysis for Combination Resources.</p>	<p>Section 5.4 Parameters for Combination Resources Other than Hydropower with Non-Pumped Storage Updates to the contribution of the underlying components to the ENC of a Combination Resource (Other than Hydropower with Non-Pumped Storage)</p> <p>Section 5.5 Parameters for Hydropower w/ Non-Pumped Storage Update to reflect CIR cap on ENC</p> <p>Section 8 BackCast Update to reflect capping of the backcasted hourly output</p>
Transition Mechanism	<p>Tariff Part VII, Subpart J, section 400 Transitional System Capability Study Rules on the Transition System Capability Study and application of the transitional capability to eligible resources.</p>	<p>Manual 14B Attachment J (new section) Business rules further detailing the transitional system capability study and application of transitional capability to eligible resources.</p>
