

GDECS - Proposed Clean-Up, Clarification and Corrections to Governing Documents

January 25, 2024

	Governing Document, Agreement, Attachment, Section, Title	Source	Current Language	Proposed Revisions	Rationale/Notes
1.	OATT 300 Definitions N; OATT 400 Definitions N	Vicki Karandrikas	<p>Network Upgrade Cost Responsibility Agreement:</p> <p>“Network Upgrade Cost Responsibility Agreement” shall mean the agreement entered into by the Project Developer Parties and the Transmission Provider pursuant to this GIP, and in the form set forth in Tariff, Part IX, Subpart H, relating to construction of Common Use Upgrades and coordination of the construction and interconnection of associated Generating Facilities. In regard to Common Use Upgrades, a separate Network Upgrade Cost Responsibility Agreement will be executed for each set of Common Use Upgrades on the system of a specific Transmission Owner that is associated with the interconnection of a Generating Facility.</p>	<p>Network Upgrade Cost Responsibility Agreement:</p> <p>“Network Upgrade Cost Responsibility Agreement” shall mean the agreement entered into by the Project Developer Parties and the Transmission Provider pursuant to this GIP, and in the form set forth in Tariff, Part IX, Subpart H, relating to construction of Common Use Upgrades and coordination of the construction and interconnection of associated Generating Facilities. In regard to Common Use Upgrades, a separate Network Upgrade Cost Responsibility Agreement will be executed for each set of Common Use Upgrades on the system of a specific Transmission Owner that is associated with the interconnection of a Generating Facility.</p>	<p>Correction made for clarity and consistency with defined term. While "Project Developer" is a defined term under the Tariff, Parts VII and VIII, "Project Developer Parties" is not.</p>
2.	OATT Part VII.A 302 Site Control; OATT Part VIII.A 402 Applications for Cycle Process, Site Control	Vicki Karandrikas	<p>b. Exclusivity</p> <p>With the exception of Tariff, Part VII, Subpart A, section 302(A)(5)(b), exclusivity is evidenced by written acknowledgement from the land owner provided to the Transmission Provider by the Project Developer as part of the Site Control that, for the Term, the Project Developer has exclusive use of the Site for the purpose of constructing a Generating Facility, Merchant Transmission Facilities, Interconnection Facilities, and, if applicable, the Transmission Owner’s Interconnection Facilities and/or Network Upgrades, and the landowner cannot make the Site Control identified for the Site available for purchase or lease, to any person or entity other than the Project Developer for any purpose or use that will interfere with the rights granted to Project Developer.</p>	<p>b. Exclusivity</p> <p>With the exception of Tariff, Part VII, Subpart A, section 302(A)(5)(b), exclusivity is evidenced by written acknowledgement from the land owner <u>landowner</u> provided to the Transmission Provider by the Project Developer as part of the Site Control that, for the Term, the Project Developer has exclusive use of the Site for the purpose of constructing a Generating Facility, Merchant Transmission Facilities, Interconnection Facilities, and, if applicable, the Transmission Owner’s Interconnection Facilities and/or Network Upgrades, and the landowner cannot make the Site Control identified for the Site available for purchase or lease, to any person or entity other than the Project Developer for any purpose or use that will interfere with the rights granted to Project Developer.</p>	<p>Change from “land owner” to “landowner” (removal of space) made for internal consistency.</p>

3.	OATT Part VII.H 337 Upgrade Requests	Vicki Karandrikas	<p>(G)(2)d.Execution and Filing</p> <p>Not later than five Business Days following the end of negotiations within the Final Agreement Negotiation Phase, Transmission Provider shall provide the final Upgrade Construction Service Agreement, to the parties in electronic form.</p> <p>i. Not later than 15 Business Days after receipt of the final interconnection related agreement, Upgrade Customer shall elect one of the following:</p> <p>(a) to execute the final Upgrade Construction Service Agreement in electronic form and return it to Transmission Provider electronically;</p> <p>(b) to request in writing dispute resolution as allowed under Tariff, Part I, section 12 or, if concerning the Regional Transmission Expansion Plan, consistent with Operating Agreement, Schedule 5; or</p> <p>(c) to request in writing that Transmission Provider file with FERC the final Construction Service Agreement or a Network Upgrade Cost Responsibility Agreement unexecuted, with terms and conditions deemed appropriate by Transmission Provider, and provide any required adjustments to Security.</p>	<p>(G)(2)d.Execution and Filing</p> <p>Not later than five Business Days following the end of negotiations within the Final Agreement Negotiation Phase, Transmission Provider shall provide the final Upgrade Construction Service Agreement, to the parties in electronic form.</p> <p>i. Not later than 15 Business Days after receipt of the final-interconnection-related-agreement <u>Upgrade Construction Service Agreement</u>, Upgrade Customer shall elect one of the following:</p> <p>(a) to execute the final Upgrade Construction Service Agreement in electronic form and return it to Transmission Provider electronically;</p> <p>(b) to request in writing dispute resolution as allowed under Tariff, Part I, section 12 or, if concerning the Regional Transmission Expansion Plan, consistent with Operating Agreement, Schedule 5; or</p> <p>(c) to request in writing that Transmission Provider file with FERC the final <u>Upgrade Construction Service Agreement</u> Construction Service Agreement or a Network Upgrade Cost Responsibility Agreement unexecuted, with terms and conditions deemed appropriate by Transmission Provider, and provide any required adjustments to Security.</p>	<p>Changes made for clarity and reflect the proper agreement type.</p> <p>Upgrade Customers receive an Upgrade Construction Service Agreement, not a Construction Service Agreement or a Network Upgrade Cost Responsibility Agreement.</p>
4.	OATT Part VIII.H 435 Upgrade Requests	Vicki Karandrikas	<p>(G)(2)d. Execution and Filing</p> <p>Not later than five Business Days following the end of negotiations within the Final Agreement Negotiation Phase, Transmission Provider shall provide the final Upgrade Construction Service Agreement, to the parties in electronic form.</p>	<p>(G)(2)d. Execution and Filing</p> <p>Not later than five Business Days following the end of negotiations within the Final Agreement Negotiation Phase, Transmission Provider shall provide the final Upgrade Construction Service Agreement, to the parties in electronic form.</p> <p>i. Not later than 15 Business Days after receipt of the final-interconnection-related-agreement <u>Upgrade Construction Service Agreement</u>, Upgrade Customer shall either:</p>	<p>Changes made for clarity and to reflect the proper agreement type.</p>

			<p>i. Not later than 15 Business Days after receipt of the final interconnection related agreement, Upgrade Customer shall either:</p> <p>(a) execute the final Upgrade Construction Service Agreement in electronic form and return it to Transmission Provider electronically;</p> <p>(b) request in writing dispute resolution as allowed under Tariff, Part I, section 12 or, if concerning the Regional Transmission Expansion Plan, consistent with Operating Agreement, Schedule 5; or</p> <p>(c) request in writing that Transmission Provider file with FERC the final interconnection related service agreement unexecuted, with the final interconnection related service agreement containing terms and conditions deemed appropriate by Transmission Provider, and provide any required adjustments to Security.</p>	<p>(a) execute the final Upgrade Construction Service Agreement in electronic form and return it to Transmission Provider electronically;</p> <p>(b) request in writing dispute resolution as allowed under Tariff, Part I, section 12 or, if concerning the Regional Transmission Expansion Plan, consistent with Operating Agreement, Schedule 5; or</p> <p>(c) request in writing that Transmission Provider file with FERC the final interconnection related service agreement Upgrade Construction Service Agreement unexecuted, with the final interconnection related service agreement Upgrade Construction Service Agreement containing terms and conditions deemed appropriate by Transmission Provider, and provide any required adjustments to Security.</p>	<p>Upgrade Customers receive an Upgrade Construction Service Agreement, not a Construction Service Agreement or a Network Upgrade Cost Responsibility Agreement.</p>
5.	OATT Part VIII.C 408 Decision Point II	Vicki Karandrikas	<p>(B)(3)b. For Study Deposits:</p> <p>i. At the conclusion of Transmission Provider's deficiency review for Decision Point II, refund to the Project Developer or Eligible Customer up to 90 percent of its Study Deposit submitted with its New Service Request during the Application Phase, less any actual costs.</p> <p>ii. Adverse Study Impact Calculation. Notwithstanding the refund provisions in Tariff, Part VIII, Subpart C, section 408(B)(3)(a) and (b)(i), Transmission Provider shall refund to Project Developer or Eligible Customer the cumulative Readiness Deposit amounts paid by Project Developer or Eligible Customer at the Application Phase and at the Decision Point I Phase if</p>	<p>(B)(3)b. For Study Deposits:</p> <p>i. At the conclusion of Transmission Provider's deficiency review for Decision Point II, refund to the Project Developer or Eligible Customer up to 90 percent of its Study Deposit submitted with its New Service Request during the Application Phase, less any actual costs.</p> <p>ii. Adverse Study Impact Calculation. Notwithstanding the refund provisions in Tariff, Part VIII, Subpart C, section 408(B)(3)(a) and (b)(i), Transmission Provider shall refund to Project Developer or Eligible Customer the cumulative Readiness Deposit amounts paid by Project Developer or Eligible Customer at the Application Phase and at the Decision Point I Phase, if the Project Developer's Network Upgrade cost from Phase I to Phase II:</p>	<p>Formatting change made for consistency with other sections.</p>

			<p>the Project Developer's Network Upgrade cost from Phase I to Phase II:</p> <p>(a) increases overall by 25 percent or more; and</p> <p>(b) increases by more than \$10,000 per MW.</p> <p>Network Upgrade costs shall include costs identified in Affected System studies in their respective phases.</p>	<p>(a)i. increases overall by 25 percent or more; and</p> <p>(b)ii. increases by more than \$10,000 per MW.</p> <p>Network Upgrade costs shall include costs identified in Affected System studies in their respective phases.</p>	
6.	OATT Part VIII.A 401 Applications for Cycle Process Intro	Vicki Karandrikas	<p>(D)(2)c. Readiness Deposit refunds will be handled as follows:</p> <p>i. If the project is withdrawn or terminated, the Readiness Deposit refunds for the project will be determined by the study phase at which the project was withdrawn or terminated, and adverse study results tests, as set forth below in Tariff, Part VIII, Subpart C, section 408(B)(3)(b).</p>	<p>D)(2)c. Readiness Deposit refunds will be handled as follows:</p> <p>i. If the project is withdrawn or terminated, the Readiness Deposit refunds for the project will be determined by the study phase at which the project was withdrawn or terminated, and adverse study results tests, as set forth below in Tariff, Part VIII, Subpart C, section 408(B)(3)(bc).</p>	Change made to correct cross-reference.
7.	OATT Part VII.C 305 Introduction, Overview and Eligibility	Vicki Karandrikas	<p>(A)2.To move forward in Transition Cycle #2, each Project Developer or Eligible Customer with valid projects in AG2 through AH1 must submit the Application and System Study Agreement in the form set forth in Tariff, Attachment IX and submit the required Study Deposit amounts and a Readiness Payment, as set forth below in Tariff, Part VII, Subpart C, section 306, Application Rules. The following restrictions apply to the Application and System Study Agreement to be submitted by the Project Developer or Eligible Customer:</p>	<p>(A)2.To move forward in Transition Cycle #2, each Project Developer or Eligible Customer with valid projects in AG2 through AH1 must submit the Application and System Studies Agreement in the form set forth in Tariff, Attachment IX and submit the required Study Deposit amounts and a Readiness Payment, as set forth below in Tariff, Part VII, Subpart C, section 306, Application Rules. The following restrictions apply to the Application and System Studies Agreement to be submitted by the Project Developer or Eligible Customer:</p>	Changes made to correct agreement's name.
8.	OATT Part VII.F 335 WMPA/Non-Jurisdictional Agreements	Vicki Karandrikas	<p>B. Generation Project Developer shall follow the Application Rules of Tariff, Part VII, Subpart C, section 306 that apply to a Generating Facility, and shall complete the Form of Application and System Impact Studies Agreement set forth in Tariff, Part IX, Subpart A (the "Application"). In the Application, Generation Project Developer shall indicate its intent to physically connect its Generating Facility to distribution or sub-transmission facilities that currently are not subject to FERC</p>	<p>B. Generation Project Developer shall follow the Application Rules of Tariff, Part VII, Subpart C, section 306 that apply to a Generating Facility, and shall complete the Form of Application and System Impact Studies Agreement set forth in Tariff, Part IX, Subpart A (the "Application"). In the Application, Generation Project Developer shall indicate its intent to physically connect its Generating Facility to distribution or sub-transmission facilities that currently are not subject to FERC jurisdiction, for the purpose of</p>	Changes made to correct agreement's name and to replace acronym with the defined term.

			jurisdiction, for the purpose of injecting energy at the POI and engaging in FERC-jurisdictional Wholesale Transactions.	injecting energy at the POI <u>Point of Interconnection</u> and engaging in FERC-jurisdictional Wholesale Transactions.	
9.	OATT Part VIII.F 433 WMPA/Non-Jurisdictional Agreements	Vicki Karandrikas	B. Generation Project Developer shall follow the Application Rules of Tariff, Part VIII, Subpart C, section 403 that apply to a Generating Facility, and shall complete the Form of Application and System Impact Studies Agreement set forth in Tariff, Part IX, Subpart A (the "Application"). In the Application, Generation Project Developer shall indicate its intent to physically connect its Generating Facility to distribution or sub-transmission facilities that currently are not subject to FERC jurisdiction, for the purpose of injecting energy at the POI and engaging in FERC-jurisdictional Wholesale Transactions.	B. Generation Project Developer shall follow the Application Rules of Tariff, Part VIII, Subpart C, section 403 that apply to a Generating Facility, and shall complete the Form of Application and System Impact Studies Agreement set forth in Tariff, Part IX, Subpart A (the "Application"). In the Application, Generation Project Developer shall indicate its intent to physically connect its Generating Facility to distribution or sub-transmission facilities that currently are not subject to FERC jurisdiction, for the purpose of injecting energy at the <u>Point of Interconnection</u> POI and engaging in FERC-jurisdictional Wholesale Transactions.	Changes made to correct agreement's name and to replace acronym with the defined term.
10.	OATT 300 Definitions E; OATT 400 Definitions E	Vicki Karandrikas	Energy Storage Resource: "Energy Storage Resource" shall mean a resource capable of receiving electric energy from the grid and storing it for later injection to the grid that participates in the PJM Energy, Capacity and/or Ancillary Services markets as a Market Participant.	Energy Storage Resource: "Energy Storage Resource" shall mean a resource capable of receiving electric energy from the grid and storing it for later injection to the grid that participates in the PJM Energy, Capacity and/or Ancillary Services markets as a Market Participant. <u>Open-Loop Hybrid Resources are not Energy Storage Resources.</u>	Changes made to reflect the definitions accepted in PJM's Docket No. ER22-1420 Hybrid Resources Participation/Mixed Technology Facilities Filing.
11.	OATT 300 Definitions S; OATT 400 Definitions S	Vicki Karandrikas	State of Charge: "State of Charge" shall mean the operating parameter that represents the quantity of physical energy stored (measured in units of megawatt-hours) in an Energy Storage Resource Model Participant in proportion to its maximum State of Charge capability. State of Charge is quantified as defined in the PJM Manuals.	State of Charge: "State of Charge" shall mean the operating parameter that represents the quantity of physical energy stored (measured in units of megawatt-hours) in an Energy Storage Resource Model Participant <u>or in a storage component of a Hybrid Resource</u> in proportion to its maximum State of Charge capability. State of Charge is quantified as defined in the PJM Manuals.	Changes made to reflect the definitions accepted in PJM's Docket No. ER22-1420 Hybrid Resources Participation/Mixed Technology Facilities Filing; Docket No. ER19-469-006 Order No. 841 Compliance Filing; and Docket No. ER23-2484 Hybrids Phase II Filing.

12.	OATT Attachment Q	Vicki Karandrikas	VI.B.3(c), (e) and -(g)	VI.B.3(c), (e) and -(g)	Changes made to add references to the Generation Interconnection Agreement and Wholesale Market Participation Agreement, which are forms of agreements filed by PJM as part of PJM's interconnection process reform filing in Docket No. ER22-2110 and accepted by the Federal Energy Regulatory Commission ("FERC" or "Commission"). ¹ Under the Tariff's FERC-approved rules, customers with pending Interconnection Requests that had been tendered for execution an Interconnection Service Agreement or other interconnection-related service before the July 10, 2023 Transition Date, ² are subject to one set of Tariff rules and forms of agreements; customers with pending Interconnection Requests that had not been tendered for execution such agreements as of the Transition Date, or that submitted an Interconnection Request on or after the Transition Date, are subject to the Tariff provisions and forms of agreements included in Parts VII, VIII and IX. ³ The changes to Tariff, Attachment Q, sections VI.B.3(c), (d) and (g) have been made to reflect the fact that the milestones and credit requirement reductions will be tied to the effective date of the underlying Interconnection Service Agreement, Generator Interconnection Agreement or Wholesale Market Participation Agreement, depending on which form of agreement the Market Participant executed.

¹ PJM filed its interconnection process reform filing with the Commission on June 14, 2022, *PJM Interconnection, L.L.C.*, Tariff Revisions for Interconnection Process Reform, Request for Commission Action by Order, Docket No. ER22-2110-000 (June 14, 2022), and accepted by FERC in *PJM Interconnection, L.L.C.*, 185 FERC ¶ 61,162 (2022) (“November 2022 Order”), *order on reh’g*, 184 FERC ¶ 61,006 (2023). PJM’s interconnection process reform filing included new Tariff, Parts VII, VIII, and IX, and revised other Tariff sections.

² The Transition Date is defined as “[t]he later of: (i) the effective date of Transmission Provider’s Docket Nos. ER22-2110-000, -001 transition cycle filing seeking FERC acceptance of this Tariff, Part VII or (ii) the date by which all AD2 and prior queue window Interconnection Service Agreements or wholesale market participation agreements have been executed or filed or executed.” Tariff, Part VII, section 301(A)(2). On July 11, 2023, PJM filed with the Commission a notice that the Transition Date occurred on July 10, 2010. *PJM Interconnection, L.L.C.*, Notification of Occurrence of Transition Date, Docket Nos. ER22-2110-000 & -001 (July 11, 2023).

³ See November 2022 Order at P 60 (accepting PJM’s proposed Transition Mechanism).

			<p>Commencement of Interconnection Service 25%</p> <p>.....</p> <p>(g) For Qualifying Transmission Upgrades, the RPM Auction Credit requirement shall be reduced to 50% of the amount calculated under section IV.B.2 above beginning as of the effective date of the latest associated Interconnection Service Agreement (or, when a project will have no such agreement, an Upgrade Construction Service Agreement), and shall be reduced to zero on the date the Qualifying Transmission Upgrade is placed in service.</p>	<p>Construction (e.g., footers poured) 5%</p> <p>Main Power Generating Equipment Delivered 25%</p> <p>Commencement of Interconnection Service 25%</p> <p>.....</p> <p>(g) For Qualifying Transmission Upgrades, the RPM Auction Credit requirement shall be reduced to 50% of the amount calculated under section IV.B.2 above beginning as of the effective date of the latest associated Interconnection Service Agreement <u>or Generation Interconnection Agreement</u> (or, when a project will have no such agreement, an Upgrade Construction Service Agreement), and shall be reduced to zero on the date the Qualifying Transmission Upgrade is placed in service.</p>

The Cycle process set forth in Tariff, Part VIII includes three study Phases and the three Decision Points:</p> <p>a. Phase I: Phase I System Impact Study and b. Decision Point I</p> <p>b. c. Phase II: Phase II System Impact Study and</p> <p>d. Decision Point II; and</p> <p>e. e. Phase III: Phase III System Impact Study and</p> <p>f. Decision Point III.</p> <p>Procedures and other terms relative to the three study Phases are set forth separately below in Tariff, Part VIII, Subpart C, sections 405, 407, and 409.</p>	Changes to clarify that each Decision Point starts following the end of the associated study phase; a Decision Point is not part of the study phase.
15.	OATT Part VII.E 329 Incremental Rights;	Vicki Karandrikas	<p>In round two, two-thirds of the Incremental Auction Revenue Rights available for each requested point-to-point combination in that round will be assigned in accordance with Tariff, Part VII, Subpart E, section 329(A)(3). In round three, all available Incremental Auction Revenue Rights will be assigned for the</p>	<p>In round two, two-thirds of the Incremental Auction Revenue Rights available for each requested point-to-point combination in that round will be assigned in accordance with Tariff, Part VII, Subpart E, section 329(A)(3). In round three, all available Incremental Auction Revenue Rights will be assigned for the requested point-to-point combinations in that round in accordance with Tariff, Part VII,</p>	Change made to include language that was mistakenly omitted from the Docket No. ER22-2110 interconnection process reform filing, and is necessary to establish the final and binding Incremental Auction Revenue Right assignment for a requested point-to-point

			<p>requested point-to-point combinations in that round in accordance with Tariff, Part VII, Subpart E, section 329(A)(3). In each round, a requester may request the same point-to-point combination as in the previous rounds or submit a different combination. In rounds one and two, requesters may accept the assignment of Incremental Auction Revenue Rights or refuse them. Acceptance of the assignment in rounds one and two will remove the assigned Incremental Auction Revenue Rights from availability in the next rounds. Refusal of an Incremental Auction Revenue Rights assignment in rounds one and two will result in the Incremental Auction Revenue Rights being available for the next round. The Incremental Auction Revenue Rights assignments made in round three will be final and binding. For each round, a request for Incremental Auction Revenue Rights shall specify a single point-to-point combination for which the Transmission Project Developer or Upgrade Customer desires Incremental Auction Revenue Rights and shall be in a form specified by the Office of the Interconnection and in accordance with procedures set forth in the PJM Manuals. The Office of the Interconnection shall specify the deadlines for submission of requests in each round of the allocation process and shall complete the allocation process before the in-service date of the upgrade.</p>	<p>Subpart E, section 329(A)(3). In each round, a requester may request the same point-to-point combination as in the previous rounds or submit a different combination. In rounds one and two, requesters may accept the assignment of Incremental Auction Revenue Rights or refuse them. Acceptance of the assignment in rounds one and two will remove the assigned Incremental Auction Revenue Rights from availability in the next rounds. Refusal of an Incremental Auction Revenue Rights assignment in rounds one and two will result in the Incremental Auction Revenue Rights being available for the next round. The Incremental Auction Revenue Rights assignments made in round three will be final and binding. <u>The final and binding Incremental Auction Revenue Right assignment for a requested point-to-point combination in each round shall in no event be less than one third of 80% and no greater than one-third of 100% of the non-binding estimate of Incremental Auction Revenue Rights for that point-to-point combination that was provided to the Transmission Project Developer or Upgrade Customer.</u> For each round, a request for Incremental Auction Revenue Rights shall specify a single point-to-point combination for which the Transmission Project Developer or Upgrade Customer desires Incremental Auction Revenue Rights and shall be in a form specified by the Office of the Interconnection and in accordance with procedures set forth in the PJM Manuals. The Office of the Interconnection shall specify the deadlines for submission of requests in each round of the allocation process and shall complete the allocation process before the in-service date of the upgrade.</p>	<p>combination. Specifically, as part of the process of developing the new Tariff provisions, PJM incorporated provisions from Tariff, Part VI into new Tariff, Parts VII and VIII. Tariff, Part VII, section 329 was intended to incorporate the provisions of Tariff, Part VII, section 231.2; however, the sentence “[t]he final and binding Incremental Auction Revenue Right assignment for a requested point-to-point combination in each round shall in no event be less than one third of 80% and no greater than one-third of 100% of the non-binding estimate of Incremental Auction Revenue Rights for that point-to-point combination that was provided to the Transmission Project Developer or Upgrade Customer” was mistakenly omitted during the drafting process.</p>
16.	OATT Part VIII.E 427 Incremental Rights	Vicki Karandrikas	<p>In round two, two-thirds of the Incremental Auction Revenue Rights available for each requested point-to-point combination in that round will be assigned in accordance with Tariff, Part VIII, Subpart E, section 427(A)(3). 44.	OATT Part IX.I	Vicki Karandrikas	<p>Tariff, Part IX, Subpart I</p> <p>FORM OF SURPLUS INTERCONNECTION SERVICE STUDY AGREEMENT</p>	<p>Tariff, Part IX, Subpart I</p> <p>FORM OF SURPLUS INTERCONNECTION SERVICE STUDY AGREEMENT</p>	Change to correct name of agreement.

45.	OATT 300 Definitions – S OATT 400 Definitions - S	Vicki Karandrikas		<u>“Surplus Interconnection Study Agreement” shall mean the form of the Surplus Interconnection Study Agreement set forth in Tariff, Part IX, Subpart I.</u>	Definition of Surplus Interconnection Study added to reflect the addition of the pro forma Surplus Interconnect Study Agreement that is now part of Tariff, Part IX. This definition simply references the applicable form of agreement under Part IX of the FERC-approved Tariff entitled, “Form of Surplus Interconnection Study Agreement.”
46.	OATT Part VII.H, 337 – Upgrade Requests OATT Part VIII.H 435 – Upgrade Requests	Vicki Karandrikas	G(1)a. If an Upgrade Request is withdrawn during the Final Agreement Negotiation Phase, the Transmission Provider shall remove the Upgrade Request from the Cycle, and adjust the Security obligations of other Upgrade Requests based on the withdrawal.	G(1)a. If an Upgrade Request is withdrawn during the Final Agreement Negotiation Phase, the Transmission Provider shall remove the Upgrade Request from the <u>upgrade study process Cycle</u> , and adjust the Security obligations of other Upgrade Requests based on the withdrawal.	Change made because under Tariff, Parts VII and VIII, Upgrade Requests are not part of the Cycle process. Upgrades Requests are subject to a separate serial process outlined in Tariff Part VII section 337 and Part VIII section 435, and thus the use of the word “Cycle” is incorrect.
47.	OATT Part IX.B – GIA	Vicki Karandrikas	1.0 Parties. Depending on whether the Interconnection Customer or Project Developer</p>

			<p>Agreement or suspended Interconnection Service Agreement may be included by the Office of the Interconnection after review with the Transmission Expansion Advisory Committee.</p>	<p><u>Generation Interconnection Agreement or executed Engineering and Procurement Agreement for which Generation Interconnection Agreement is expected to be executed.</u> Facilities with an executed Facilities Study Agreement or suspended Interconnection Service Agreement, <u>or that have an approved Decision Point II submission, under Tariff Part VII or VIII, as applicable,</u> may be included by the Office of the Interconnection after review with the Transmission Expansion Advisory Committee.</p>	<p>received an interconnection-related service agreement prior to, or on or after, the Transition Date, the generating facility will be referred to as the Customer Facility or the Generating Facility, and the applicable form of agreement will be an Interconnection Service Agreement, under Tariff, Attachment O, or an Interim Interconnection Service Agreement, under Tariff Attachment O-1, or a Generation Interconnection Agreement, or Engineering and Procurement Agreement, under Tariff, Part IX.</p> <p>The last change was made because while Tariff, Part VI uses separate study agreements for the different study phases, Tariff, Parts VII and VIII use a single study agreement that is executed at the start of a Cycle, as outlined in Tariff, Part VII, section 306(A)(5)(a) and Tariff, Part VIII, section 403(A)(5)(a). Having an approved Decision Point II submission is the comparable phase of the study process under Tariff Parts, VII and VIII as having an executed Facilities Study Agreement under Part VI.</p>
53.	OA Schedule 6	Vicki Karandrikas	<p>1.7.5(i)(vii) Expected levels of potential new generation and generation retirements over at least the ensuing fifteen years based on analyses that consider generation trends based on existing generation on the system, generation in the PJM interconnection queues and Capacity Resource Clearing Prices under the Tariff, Attachment DD. If the Office of the Interconnection finds that the PJM reserve requirement is not met in any of its future year market efficiency analyses then it will model Customer Facilities pursuant to an executed Facilities Study Agreement or suspended Interconnection Service Agreement, ranked by their commercial probability. Commercial probability utilizes historical data from the PJM interconnection queues to determine the likelihood</p>	<p>1.7.5(i)(vii): Expected levels of potential new generation and generation retirements over at least the ensuing fifteen years based on analyses that consider generation trends based on existing generation on the system, generation in the PJM interconnection queues <u>or Cycles as applicable</u> and Capacity Resource Clearing Prices under the Tariff, Attachment DD. If the Office of the Interconnection finds that the PJM reserve requirement is not met in any of its future year market efficiency analyses then it will model Customer Facilities <u>or Generating Facilities</u> pursuant to an executed Facilities Study Agreement, <u>approved Decision Point II submission under Tariff Part VII or VIII,</u> or suspended Interconnection Service Agreement, ranked by their commercial probability. Commercial probability utilizes historical data from the PJM interconnection queues <u>or Cycles as applicable</u></p>	<p>Changes were made throughout to include references to the terminology and forms of agreement under Tariff, Parts VII, VIII and IX. Depending on whether the Interconnection Customer or Project Developer received an interconnection-related service agreement prior to, or on or after, the Transition Date, it will be subject to prior interconnection queue process or the Tariff, Parts VII and VIII Cycle process, and the generating facility will be referred as the Customer Facility or the Generating Facility.</p>

			of a Customer Facility, pursuant to an executed Facilities Study Agreement or suspended Interconnection Service Agreement, reaching commercial operation. If the Office of the Interconnection finds that the PJM reserve requirement is not met in any of its future year market efficiency analyses, following inclusion of the Customer Facilities discussed above in this section 1.5.7(i)(vii), then it will model adequate future generation based on type and location of generation in existing PJM interconnection queues and, if necessary, add transmission enhancements to address congestion that arises from such modelin	to determine the likelihood of a Customer Facility <u>or Generating Facility</u> , pursuant to an executed Facilities Study Agreement, <u>approved Decision Point II submission under Tariff Part VII or VIII</u> , or suspended Interconnection Service Agreement, reaching commercial operation. If the Office of the Interconnection finds that the PJM reserve requirement is not met in any of its future year market efficiency analyses, following inclusion of the Customer Facilities <u>or Generating Facilities</u> discussed above in this section 1.5.7(i)(vii), then it will model adequate future generation based on type and location of generation in existing PJM interconnection queues <u>or Cycles as applicable</u> and, if necessary, add transmission enhancements to address congestion that arises from such modeling.	Additional changes were made because while Tariff, Part VI uses separate study agreements for the different study phases, Tariff, Parts VII and VIII use a single study agreement that is executed at the start of a Cycle, as outlined in Tariff, Part VII, section 306(A)(5)(a) and Tariff, Part VIII, section 403(A)(5)(a). Having an approved Decision Point II submission is the comparable phase of the study process under Tariff Parts, VII and VIII as having an executed Facilities Study Agreement under Part VI.
54.	RAA, Article 1, Definitions	Vicki Karandrikas	Planned External Generation Capacity Resource: “Planned External Generation Capacity Resource” shall mean a proposed Generation Capacity Resource, or a proposed increase in the capability of a Generation Capacity Resource, that (a) is to be located outside the PJM Region, (b) participates in the generation interconnection process of a Control Area external to PJM, (c) is scheduled to be physically and electrically interconnected to the transmission facilities of such Control Area on or before the first day of the Delivery Year for which such resource is to be committed to satisfy the reliability requirements of the PJM Region, and (d) is in full commercial operation prior to the first day of such Delivery Year, such that it is sufficient to provide the Installed Capacity set forth in the Sell Offer forming the basis of such resource’s commitment to the PJM Region. Prior to participation in any Base Residual Auction for such Delivery Year, the Capacity Market Seller must demonstrate that it has a fully executed system impact study agreement (or other documentation which is functionally equivalent to a System Impact Study Agreement under the PJM Tariff) or, for resources which are greater than 20MWs participating in a Base Residual	“Planned External Generation Capacity Resource” shall mean a proposed Generation Capacity Resource, or a proposed increase in the capability of a Generation Capacity Resource, that (a) is to be located outside the PJM Region, (b) participates in the generation interconnection process of a Control Area external to PJM, (c) is scheduled to be physically and electrically interconnected to the transmission facilities of such Control Area on or before the first day of the Delivery Year for which such resource is to be committed to satisfy the reliability requirements of the PJM Region, and (d) is in full commercial operation prior to the first day of such Delivery Year, such that it is sufficient to provide the Installed Capacity set forth in the Sell Offer forming the basis of such resource’s commitment to the PJM Region. Prior to participation in any Base Residual Auction for such Delivery Year, the Capacity Market Seller must demonstrate that it has a fully executed system impact study agreement (or other documentation which is functionally equivalent to an approved Decision Point I submission System Impact Study agreement under PJM Tariff <u>Part VII or VIII as applicable</u>) or, for resources which are greater than 20 MWs participating in a Base Residual Auction for the 2019/2020 Delivery Year and subsequent Delivery Years, an agreement or other documentation which is functionally equivalent	Changes made because while Tariff, Part VI uses separate study agreements for the different study phases, Tariff, Parts VII and VIII use a single study agreement that is executed at the start of a Cycle, as outlined in Tariff, Part VII, section 306(A)(5)(a) and Tariff, Part VIII, section 403(A)(5)(a). Having an approved Decision Point II submission is the comparable phase of the study process under Tariff Parts, VII and VIII as having an executed System Impact Study Agreement under Part VI. In addition, the phrase “functionally equivalent to an Interconnection Service Agreement” was replaced with “functionally equivalent to a Generation Interconnection Agreement” to reference the current form of Agreement.

		<p>Auction for the 2019/2020 Delivery Year and subsequent Delivery Years, an agreement or other documentation which is functionally equivalent to a Facilities Study Agreement under the PJM Tariff), with the transmission owner to whose transmission facilities or distribution facilities the resource is being directly connected, and, as applicable, the transmission provider. Prior to participating in any Incremental Auction for such Delivery Year, the Capacity Market Seller must demonstrate it has entered into an interconnection agreement, or such other documentation that is functionally equivalent to an Interconnection Service Agreement under the PJM Tariff, with the transmission owner to whose transmission facilities or distribution facilities the resource is being directly connected, and, as applicable, the transmission provider. A Planned External Generation Capacity Resource must provide evidence to PJM that it has been studied as a Network Resource, or such other similar interconnection product in such external Control Area, must provide contractual evidence that it has applied for or purchased transmission service to be deliverable to the PJM border, and must provide contractual evidence that it has applied for transmission service to be deliverable to the bus at which energy is to delivered, the agreements for which must have been executed prior to participation in any Reliability Pricing Model Auction for such Delivery Year. Any such resource shall cease to be considered a Planned External Generation Capacity Resource as of the earlier of (i) the date that interconnection service commences as to such resource; or (ii) the resource has cleared an RPM Auction, in which case it shall become an Existing Generation Capacity Resource for purposes of the mitigation of offers for any RPM Auction for all subsequent Delivery Years.</p>	<p>to an approved Decision Point II submission Facilities Study Agreement under the PJM Tariff <u>Part VII or VIII as applicable</u>), with the transmission owner to whose transmission facilities or distribution facilities the resource is being directly connected, and, as applicable, the transmission provider.</p> <p>Prior to participating in any Incremental Auction for such Delivery Year, the Capacity Market Seller must demonstrate it has entered into an interconnection agreement, or such other documentation that is functionally equivalent to an <u>Generation Service</u> Agreement under the PJM Tariff, with the transmission owner to whose transmission facilities or distribution facilities the resource is being directly connected, and, as applicable, the transmission provider.</p> <p>A Planned External Generation Capacity Resource must provide evidence to PJM that it has been studied as a Network Resource, or such other similar interconnection product in such external Control Area, must provide contractual evidence that it has applied for or purchased transmission service to be deliverable to the PJM border, and must provide contractual evidence that it has applied for transmission service to be deliverable to the bus at which energy is to delivered, the agreements for which must have been executed prior to participation in any Reliability Pricing Model Auction for such Delivery Year. In the event there are any Common Use Upgrades listed in Specification section 3.0 of this GIA, Transmission Provider and Project Developer, along with the other relevant Project Developers, shall also be required to enter into a separate Network Upgrade Cost Responsibility Agreement in the form set forth in Tariff, Part IX, Subpart H.	10.4.1 Schedule L of this GIA sets forth the additional terms and conditions of service that apply in the event there are any there are Project Developer Interconnection Facilities, Transmission Owner Interconnection Facilities, or Transmission Owner Upgrades subject to this Agreement. In the event there is an additional Transmission Owner listed in Specification section 3.0(c), Transmission Provider, Project Developer and the additional Transmission Owner shall be required to enter into a separate Interconnection Construction Service Agreement in the form set forth in Tariff, Part IX, Subpart J. In the event there are any Common Use Upgrades listed in Specification section 3.0 of this GIA, Transmission Provider and Project Developer, along with the other relevant Project Developers, shall also be required to enter into a separate Network Upgrade Cost Responsibility Agreement in the form set forth in Tariff, Part IX, Subpart H.	Change made for grammatical purposes.
74.	OATT 300 Definitions S; OATT 400 Definitions N	Vicki Karandrikas	“Schedule of Work” shall mean that Schedule of Work set forth in section 8.0 of a GIA, or Schedule of an ICSA, as applicable, setting forth the timing of work to be performed by the Constructing Entity(ies), based upon the System Impact Study(ies) and subject to modification, as required, in accordance with Transmission Provider’s scope change process for interconnection projects set forth in the PJM Manuals.	“Schedule of Work” shall mean that Schedule of Work set forth in section 8.0 of Schedule L of a GIA, or Schedule of a CSA an ICSA, as applicable, setting forth the timing of work to be performed by the Constructing Entity(ies), based upon the System Impact Study(ies) and subject to modification, as required, in accordance with Transmission Provider’s scope change process for interconnection projects set forth in the PJM Manuals.	Changes made to clarify the cross-reference to section 8.0, and for internal consistency.
75.	OATT Part I, Definitions C - D	Erin Lai	Continuous Mode: “Continuous Mode” shall mean the mode of operation of an Energy Storage Resource Model Participant or solar-storage Open-Loop Hybrid Resource that includes both negative and positive megawatt quantities (i.e., the Energy Storage Resource Model Participant or solar-storage Open-Loop Hybrid Resource is capable of continually and immediately transitioning from	Continuous Mode: “Continuous Mode” shall mean the mode of operation of an Energy Storage Resource Model Participant or solar-storage Open-Loop Hybrid Resource that includes both negative and positive megawatt quantities (i.e., the Energy Storage Resource Model Participant or solar-storage Open-Loop Hybrid Resource is capable of continually and immediately transitioning from withdrawing megawatt quantities from the grid to injecting megawatt quantities onto the	Changes made to delete the references to solar storage. As part of its July 26, 2023 filing in Docket No. ER23-2484, PJM expanded the provisions in its Tariff and its Operating Agreement to apply to a broader set of mixed technology resources, but mistakenly did not delete the references to solar storage resources from the definition. This change is consistent with the intent of the Docket No.

			withdrawing megawatt quantities from the grid to injecting megawatt quantities onto the grid or injecting megawatts to withdrawing megawatts). Energy Storage Resource Model Participants or solar-storage Open-Loop Hybrid Resource operating in Continuous Mode are considered to have an unlimited ramp rate. Continuous Mode requires Discharge Economic Maximum Megawatts to be zero or correspond to an injection, and Charge Economic Maximum Megawatts to be zero or correspond to a withdrawal.	grid or injecting megawatts to withdrawing megawatts). Energy Storage Resource Model Participants or solar-storage Open-Loop Hybrid Resource operating in Continuous Mode are considered to have an unlimited ramp rate. Continuous Mode requires Discharge Economic Maximum Megawatts to be zero or correspond to an injection, and Charge Economic Maximum Megawatts to be zero or correspond to a withdrawal.	ER23-2484 filing, which was accepted by FERC in <i>PJM Interconnection, L.L.C.</i> , Letter Order, Docket No. ER23-2484-000 (Sept. 22, 2023).
76.	OATT Part I Definitions C-D	Erin Lai	Discharge Economic Maximum Megawatts: “Discharge Economic Maximum Megawatts” shall mean the maximum megawatt power output available for discharge in economic dispatch by an Energy Storage Resource Model Participant or solar-storage Open-Loop Hybrid Resource in Continuous Mode or in Discharge Mode. Discharge Economic Maximum Megawatts shall be the Economic Maximum for an Energy Storage Resource or solar-storage Open-Loop Hybrid Resource in Discharge Mode or in Continuous Mode.	Discharge Economic Maximum Megawatts: “Discharge Economic Maximum Megawatts” shall mean the maximum megawatt power output available for discharge in economic dispatch by an Energy Storage Resource Model Participant or solar-storage Open-Loop Hybrid Resource in Continuous Mode or in Discharge Mode. Discharge Economic Maximum Megawatts shall be the Economic Maximum for an Energy Storage Resource or solar-storage Open-Loop Hybrid Resource in Discharge Mode or in Continuous Mode.	Changes made to delete the references to solar storage. As part of its July 26, 2023 filing in Docket No. ER23-2484, PJM expanded the provisions in its Tariff and its Operating Agreement to apply to a broader set of mixed technology resources, but mistakenly did not delete the references to solar storage resources from the definition. This change is consistent with the intent of the Docket No. ER23-2484 filing, which was accepted by FERC in <i>PJM Interconnection, L.L.C.</i> , Letter Order, Docket No. ER23-2484-000 (Sept. 22, 2023).
77.	OATT Part I Definitions C - D	Erin Lai	Discharge Economic Minimum Megawatts: “Discharge Economic Minimum Megawatts” shall mean the minimum megawatt power output available for discharge in economic dispatch by an Energy Storage Resource Model Participant or solar-storage Open-Loop Hybrid Resource in Discharge Mode. Discharge Economic Minimum Megawatts shall be the Economic Minimum for an Energy Storage Resource or solar-storage Open-Loop Hybrid Resource in Discharge Mode.	Discharge Economic Minimum Megawatts: “Discharge Economic Minimum Megawatts” shall mean the minimum megawatt power output available for discharge in economic dispatch by an Energy Storage Resource Model Participant or solar-storage Open-Loop Hybrid Resource in Discharge Mode. Discharge Economic Minimum Megawatts shall be the Economic Minimum for an Energy Storage Resource or solar-storage Open-Loop Hybrid Resource in Discharge Mode.	Changes made to delete the references to solar storage. As part of its July 26, 2023 filing in Docket No. ER23-2484, PJM expanded the provisions in its Tariff and its Operating Agreement to apply to a broader set of mixed technology resources, but mistakenly did not delete the references to solar storage resources from the definition. This change is consistent with the intent of the Docket No. ER23-2484 filing, which was accepted by FERC in <i>PJM Interconnection, L.L.C.</i> , Letter Order, Docket No. ER23-2484-000 (Sept. 22, 2023).

78.
