

Capacity Market Reform Phase 2

Reliability Services

Chris Pulong - Director, Operations Planning

Alex Scheirer - Sr. Client Manager II

Operating Committee

November 4, 2021

- The Resource Adequacy Senior Task Force (RASTF) was formed to discuss capacity market reform topics beyond the CIFP-MOPR and recommend possible changes to the capacity market.
- The RASTF will discuss many topics such as capacity procurement, qualification and performance, and more.
 - Some topics will be addressed in other stakeholder venues
 - RASTF will serve as a central group to coordinate those efforts

Evaluating the need for PJM's procurement of additional reliability-based services, with a particular focus on reliability needs in the face of the changing resource portfolio and increased penetration of intermittent resource technologies

- Initial discussion, education and assessment of reliability products and services shall be performed in the OC.
- Such initial discussion, education and assessment shall occur and a decision on initial direction determined at the OC by end of Q1 2022.
- Depending on the outcome, the appropriate Problem Statement(s) and Issue Charge(s) shall be established through a vote at the MRC.

- Initial list from the report “Reliability in PJM: Today and Tomorrow”
 - Energy adequacy
 - Frequency Response
 - Inertial, Primary, Secondary
 - Ramping
 - Regulation, Load-Following, Synch/Primary/Operating Reserves
 - Flexibility/ability to cycle
 - Voltage control
 - Black Start requirements
