<b>STANDARD: CIP-014</b>	<b><u>Project 2023-06</u> CIP-014 Risk Assessment Refinement – Standard Authorization Request (SAR)</b>
------------------------------	---

PROJECT BACKGROUND:	Action	End Date
<p>Due to an increase in reports of physical attacks on electric substations, FERC directed NERC to evaluate the effectiveness of the Physical Security Reliability Standard CIP-014-3 in mitigating the risks to the BPS associated with physical attacks. In the <a href="#">report</a> filed, NERC found that CIP-014-3 required revision to assure adequate and consistent approach in evaluating instability as well as the identification of infrastructure critical to the operation of the BPS.</p> <p><a href="#">Comment Form</a></p>	<p><b>Comments &amp; Standard Drafting Team Nominations</b></p>	<p><b>08/24/23</b></p>

## Comment Period Open for Draft 2024-2026 Reliability Standards Development Plan ([RSDP](#))

### RSDP BACKGROUND:

The 2024-2026 RSDP provides insight into standards development activities anticipated at the time of publication so that stakeholders may make available appropriate resources to support the identified standards development objectives. Additional activities, such as Requests for Interpretation and development of Regional Variances, may impact the plan, which is a snapshot of activities anticipated for the 2024-2026 period. In order to help the industry understand resource requirements for each project, the RSDP now shows timeframes and anticipated resources for each project under development.
