

Issue Content

This work effort is designed to consider whether the development of Tariff, Operating Agreement (“OA”), and Manual language is needed to address **potential** CMPs **other than those referenced** in the August 12, 2019 notice and other security impacted facilities.

Key Work Activities and Scope

Old Version: Evaluate and discuss the development of a new category of transmission planning to address both the current CMPs and future CIP-014 facility avoidance.

- Friendly Amendment: **Evaluate and discuss the development of a new category of transmission planning to address future CIP-014 facility avoidance. Evaluate and discuss the overlap of a new category of transmission planning and the potential M4 filing.**

Old Version: Identify and establish PJM’s role in the evaluation of potential solutions as well as any alternatives PJM independently determines provide a more efficient or cost-effective approach to address both the current CMPs and future CIP-014 facility avoidance

- Friendly Amendment: **Identify and establish PJM’s role in the evaluation of potential solutions as well as any alternatives PJM independently determines provide a more efficient or cost-effective approach to address future CIP-014 facility avoidance. Discuss PJM’s role in the current CIP-014 Asset mitigation process as outlined in the potential M4 filing.**
