

Load Analysis Subcommittee Charter Approval

Andrew Gledhill

Planning Committee

August 6, 2024

- Last updated in 2005
- Legacy of when PJM was a clearing house for Transmission Owner forecasts
- PJM gathered Transmission Owner forecasts rather than producing our own independent forecast as we do today

- Updated language describes the Load Analysis Subcommittee role to review the PJM independent Load Forecast
- Notes that LAS is a non-voting subcommittee
- Meetings are scheduled as needed
- Removal of core competencies list as the LAS group is attended by both technical forecasters and non-technical business members.
- Uses PJM's updated template
