Dominion Transmission Zone: Supplemental Customer Load Request

Need Number: DOM-2018-0016
Meeting Date: 11/29/2018
Process Stage: NEED - REVISED
Supplemental Project Driver: Customer Service

Problem Statement:

DEV Distribution has submitted a DP Request to replace their existing transmission to distribution transformer at Remington Substation in Fauquier County with a higher capacity bank to meet customer load. Requested in-service date is 11/15/2019.

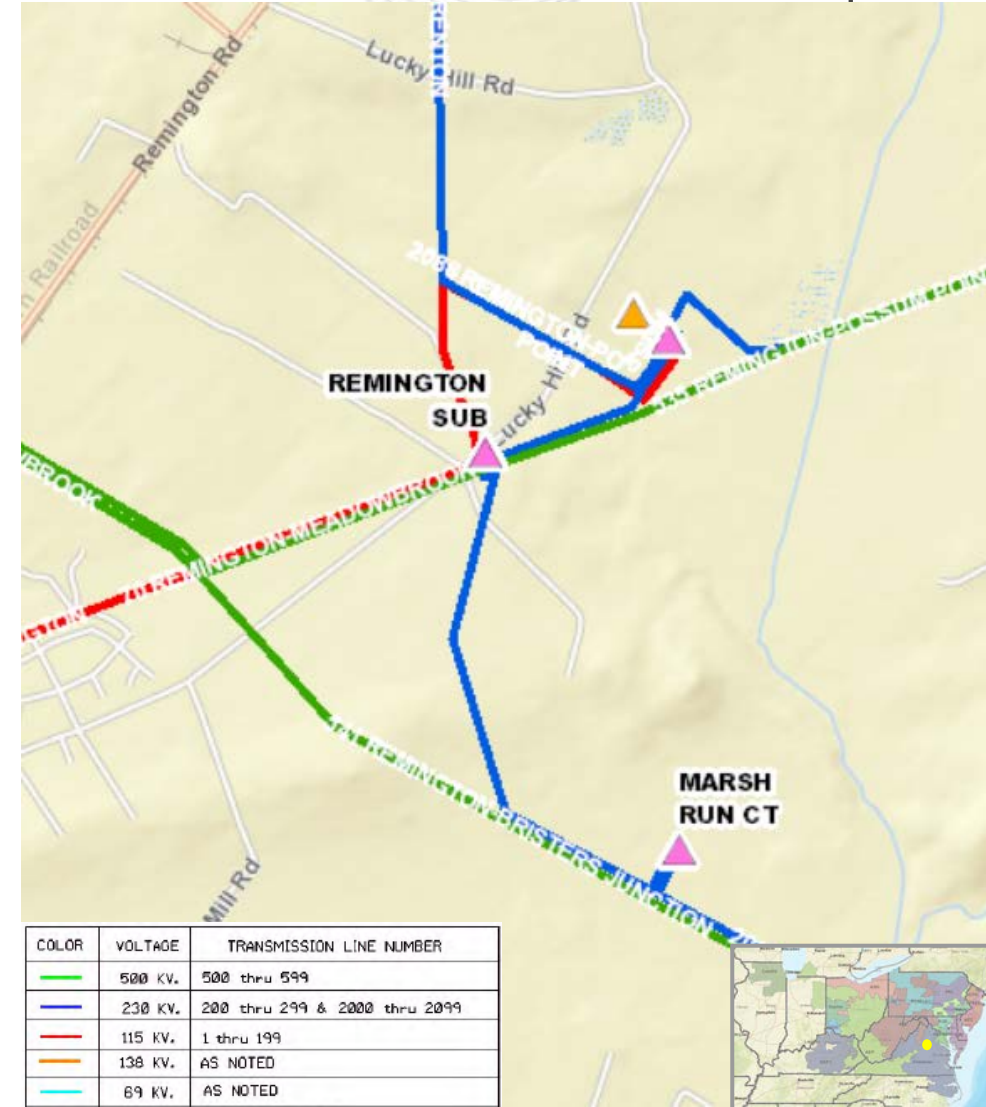

Projected Peak Loading In The Next Five Years

Summer: 60 MW (Previously 105 MW)
 Winter: 78 MW (Previously 109 MW)

A future station will reduce loading at Remington from the levels shown at the September 28, 2018 SRRTEP meeting.

Specific Assumption References:

Customer load request will be evaluated per Dominion’s Facility Interconnection Requirements Document and Dominion’s Transmission Planning Criteria.
