eDART Forum Charter

Mission

To work in partnership with PJM member users of eDART to discuss future enhancements and review and address member concerns using the tool in a group setting.

Background

The eDART Forum (formerly called the eDART Users Group (EDUG)) was developed to work with PJM members using the eDART suite of applications to both inform and receive feedback from members on upcoming enhancements and any issues member users would wish to discuss in a group setting. Also, ideas are shared between members on use of different functionality within eDART. Areas of focus for these meetings are around the internet forms and reports. Another group eDART XML Forum (formerly called the eDART XML Users Group (EDXUG)) focuses on the IT related browserless XML interface.

Since certain applications are focused on transmission owning (TO) members, at times meetings will be scheduled as eDART Forum-Transmission when only TO related functionality will be discussed. Also since certain applications are focused on generation owning (GO) and/or markets members, at times meetings will be scheduled as eDART Forum-Generation when only functionality related to those audiences will be discussed. Meetings are normally scheduled on a quarterly or semi-annual basis most often based on the enhancement releases scheduled for eDART. They are scheduled as WebEx sessions.

Responsibilities

1. Review upcoming eDART enhancements.
2. Solicit PJM member user feedback on any issues experienced using the tool that may be experienced by multiple member companies.
3. Provide Subject Matter Expert (SME) support as needed.

Administrative

1. Membership of the eDART Forum is open to all PJM members.
2. Members of the group can sign up to be included in the email distribution list via My Email Lists on pjm.com.
3. PJM staff will be responsible for preparing and issuing all materials to be discussed at the meetings and having them posted on the eDART Forum webpage (<https://www.pjm.com/committees-and-groups/tech-change-forum/edart-forum.aspx>) under Meeting Materials, listed by meeting date.
