## eDART XML Forum Charter

### *Mission*

To work in partnership with PJM member XML interface related IT staff (e.g. Developers, Business Administrators) responsible for their company's browserless XML interface with the eDART suite of tools to discuss future enhancements and review and address member concerns using the eDART browserless interface in a group setting.

### *Background*

The eDART XML Forum (formerly called the eDART XML Users Group (EDXUG)) was developed to work with PJM member IT staff using the eDART suite of applications to both inform and receive feedback from members on upcoming enhancements and any issues member users would wish to discuss in a group setting regarding the eDART browserless interface. Those attending can include contractors for members and other non-member individuals using the browserless XML interface. Also, ideas are shared between members on use of different uploads and downloads within eDART. Another group eDART Forum (formerly called the eDART Users Group (EDUG)) focuses on the graphical user interface (GUI) frontend.

Meetings are normally only scheduled around upcoming enhancement releases scheduled for eDART where the XML interface is impacted. They are scheduled as WebEx and/or Conference Call sessions. In addition to the eDART XML Forum webpage (<https://www.pjm.com/committees-and-groups/tech-change-forum/edart-forum.aspx>) where all meeting announcements are posted with meeting materials, members can review the XML Documentation Page (<http://pjm.com/pub/etools/edart/xmldocs/xmldoc.html>) where all eDART XML functionality is outlined.

### *Responsibilities*

1. Review upcoming eDART enhancements.
2. Solicit PJM member user feedback on any issues experienced using the eDART XML interface that may be experienced by multiple member companies.
3. Provide Subject Matter Expert (SME) support as needed.

### *Administrative*

1. Membership of the eDART XML Forum is open to all PJM members.
2. Members of the group can sign up to be included in the email distribution list via My Email Lists on [pjm.com](http://pjm.com).
3. PJM staff will be responsible for preparing and issuing all materials to be discussed at the meetings and having them posted on the eDART Forum webpage (<https://www.pjm.com/committees-and-groups/tech-change-forum/edart-forum.aspx>) under Meeting Materials, listed by meeting date.
