Article	
7	TO Filing Rights
8	TOA – Administrative Committee

- Requires public utilities to file with the Commission all rates and charges for any transmission or sale subject to the jurisdiction of the Commission.
- Requires that tariffs, rate schedules, service agreements and contracts relevant to services offered must be filed at FERC.

Note: To approve the filings, the Commission must find that the rates are just and reasonable and not unduly discriminatory and preferential.

- Allows the Commission to modify rates upon its own motion or upon motion or complaint.
- Requires that in order to modify or replace the filed rate, the proponent of a change to the filed rate must meet a dual burden of:
 - **First:** establishing that the current rate is unjust and unreasonable
 - **Second:** establishing that the alternative rate proposal is just and reasonable

Note: It is not sufficient to simply demonstrate an alternative is superior to the current rate.

Who can amend & under what FPA section

OA

- Requires 2/3 endorsement by Members Committee to amend under FPA 205
- If 2/3 endorsement not achieved:
 - the Board can authorize PJM to file under FPA 206
 - Others can seek to change the OA through filing a complaint under FPA 206

TARIFF

- PJM can file under FPA 205 without 2/3 endorsement of Members Committee
 - *Even though we could technically file under FPA 205 without any stakeholder process, our practice is to work toward endorsement*
 - *TOs have FPA 205 filing rights over certain aspects of the Tariff*
- But would seek Board support for making such a filing
- Others can seek changes to the Tariff through filing a complaint under FPA 206

RAA

- Only the Board has the ability to approve amendments to the RAA under FPA 205
- We typically seek endorsement through the stakeholder process to inform the Board
- Others can seek changes to the RAA through filing a complaint under FPA 206

CTOA

- Only parties to the CTOA can amend the CTOA under FPA 205
- Others can seek changes to the CTOA through filing a complaint under FPA 206

	Stakeholder Group	Who Can Vote*	Decision-Making Methodology	Threshold for Endorsement (passing)	Sector Weighted Voting?	What moves up to Parent Committee?
Non-Voting	Sub-Committee	N/A	Strive for consensus. (Tier 1). If no consensus is achieved, produce multiple proposals (Tier 2).	Tier 1: All members can live with the proposal. Tier 2: At least three supporting voting members from two sectors. Sector-Weighted Vote Calculation Example

Sector	For	Against	Abstain	% in Favor (of those voting For or Against)
Electric Distributor Sector	8	2	4	0.800
End-Use Customer Sector	15	0	1	1.000
Generation Owner Sector	10	10	5	0.500
Other Supplier Sector	3	7	15	0.300
Transmission Owner Sector	12	2	0	0.857
Sum				3.457

Threshold **.667 x 5 Sectors = 3.335**

Standing Committee Voting Example

Lower-Level Standing Committee

P1 Proposal 1 = 68%
P2 Proposal 2 = 45%
P3 Proposal 3 = 90%

EXAMPLE

Proposals receiving over 50 percent are ranked and passed on to the MRC

MRC Vote

P3 Proposal 3: (voted first) *3.13
P1 Proposal 1: *4.25
P2 Proposal 2: Not voted on

EXAMPLE

Proposals receiving over 50 percent are ranked and passed on to the MRC

MRC voting stops when this threshold is reached. *Note: To pass a vote must be greater or equal to 3.335.

MC Vote

Proposal 1 must receive a super majority to pass at the MC

P1 Proposal 1 passes — *4.12

Committees & Groups

PJM Interconnection committees and groups are integral to developing and refining PJM's rules, policies and processes. These groups provide a forum for members to share their positions and resolve difficult issues. Market committees are essential to PJM's governance structure for administering an open grid and transparent markets.

A collaborative approach - a hallmark of the way PJM conducts business - enhances our ability to maintain grid reliability and ensure robust markets.
