# DISPLAYING YOUR FULL NAME IN WEBEX

To ensure that other meeting attendees can identify you on Webex, it is important that both your first and last name are displayed in the participant list while attending a meeting.

- Displaying your first and last name is a **requirement** when joining all stakeholder meetings.

- If you are a frequent Webex user, your display name may automatically pre-populate based on how you have entered it during a previous meeting.

Note: If you do not see the option to change your name on the Join Meeting page, and it is displaying incorrectly once you join the meeting, please contact PJM Meeting Support (PJMMeetingSupport@pjm.com).
