

Single User Multi-Accounts (SUMA) Interface

Donald Wassinger

As of April 21, 2022

Action Required	Deadline	Who May Be Affected
Update to PJM Command Line Interface (CLI) version 1.5.4	April 30 5:00 p.m.	PJM CLI users
Update custom code to account for new behavior – there will be no material impact if changes are not made	April 30 5:00 p.m.	PJM Tools API Consumers

Functionality	Current behavior	New behavior
<p>Passing an invalid account value in the Suma-Account http header</p>	<p>The last successful account is returned. If no last successful account, a http 500 error is returned.</p>	<p>A http 403 error will always be returned.</p>
<p>Http session cookies</p>	<p>The account associated with session cookie overrides the Suma-Account http header.</p>	<p>The Suma-Account http header will override the session cookie when a Suma-Account value is set.</p>
<p>Data association</p>	<p>When data is returned, there is no easy way to identify the account the data belongs to.</p>	<p>A new header (X-Active-Account) will be returned in http responses to specify which account the content in the response is associated with.</p>
