

# Jonathon E. Monken

**Jonathon E. Monken** is senior director, System Resiliency and Strategic Coordination in the ITS Division of PJM Interconnection.

In this capacity, Mr. Monken works to build enterprise-level resilience in the areas of business continuity, physical and cyber security, risk management, operations and planning.

Mr. Monken served as vice president, U.S. Operations for the Electric Infrastructure Security Council. In this role he worked with government and industry officials to develop best practices and capabilities to improve the resilience of life support infrastructure systems to widespread, long-duration power outages, known as “Black Sky” events.

Mr. Monken also served as director of the Illinois Emergency Management Agency from February of 2011 to January of 2015 where he oversaw Illinois’ disaster preparedness and response, nuclear safety and homeland security programs, as well as the agency’s 225+ employees and a budget of more than \$425 million. In this capacity, he served as the Illinois Homeland Security Advisor to the Governor. At IEMA, Mr. Monken directed the response and recovery effort to a wide variety of disasters including flooding, blizzards and tornadoes.

Prior to becoming IEMA director, Mr. Monken served for two years as Acting Director of the Illinois State Police, an agency with a staff of 3,400 sworn and civilian personnel and an annual budget of approximately \$428 million.

Mr. Monken also possesses a distinguished military career having served as an armor officer for one tour of duty in Kosovo and two combat tours in Iraq between January 2003 and December 2006. While serving with the United States Army, Major Monken was awarded the Bronze Star Medal and the Army Commendation Medal with “V” Device for valor in combat. He is currently serving in the Army Reserves supporting the National Cybersecurity and Communications Integration Center at the U.S. Department of Homeland Security.

Monken earned a Bachelor of Science Degree from the United States Military Academy at West Point, and holds a Masters in Business Administration from Northwestern University’s Kellogg School of Management.

[PJM Interconnection](#), founded in 1927, ensures the reliability of the high-voltage electric power system serving 65 million people in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia. PJM coordinates and directs the operation of the region’s transmission grid, which includes over 82,000 miles of transmission lines; administers a competitive wholesale electricity market; and plans regional transmission expansion improvements to maintain grid reliability and relieve congestion. PJM’s regional grid and market operations produce annual savings of \$2.8 billion to \$3.1 billion.
