

Joint and Common Market

INTERREGIONAL PLANNING UPDATE

Jeffrey Goldberg
Senior Engineer, PJM
Transmission Planning

February 15, 2022

Annual Issues Review Process (JOA §9.3.7.2)

- In the 4th quarter the RTOs exchanged the following (completed Dec. 2021)
 - Regional issues and newly approved projects near the seam
 - New regional issues
 - M2M historical congestion
- The RTOs jointly reviewed these items in January
- We receive third party issues in the first quarter, but no less than 30 days prior to the Issues Review IPSAC – **January 18**
- **Issues Review IPSAC – February 17**
 - Held in the first quarter of each year
 - Must provide 60 calendar day notice of scheduled date
 - Stakeholder feedback due 30 days prior to IPSAC
- Within 45 calendar days after the Issues Review IPSAC the JRPC shall determine the need for a Coordinated System Plan (CSP) study – **by April 3**
- The JRPC notifies the IPSAC of its decision within 5 business days

Coordinated System Plan

- The Annual Issues Review (including stakeholder feedback) provides the basis for the JRPC to determine Coordinated System Plan (CSP) study needs
- CSP studies include:
 - Interregional Market Efficiency Project (IMEP)
 - Targeted Market Efficiency Project (TMEP)
 - Interregional Reliability Project (IRP)
 - Public Policy
 - Ad Hoc studies
