Dispatch Agents

1. CPower supports a *properly designed* Dispatch Agent (DA) construct.
 1. CPower recommends that the DA functions as the agent of the DER that signs the Interconnection Agreement.
 2. EDC rights to direct DER activity should be addressed in the Interconnection Agreement.
 3. The DA is not the Agent of the EDC.
2. CPower supports appropriate qualification requirements
3. The Aggregator designates the DA at registration.
 1. The DA need not be the Aggregator
4. CPower opposes PJM provisions to require EDC approval of Dispatch Agents.
