

DR Regulation Registration – Draft Business Rules

- 1) Create new Economic Regulation registration – this registration permits participation in regulation market only and is subject to all existing registration business rules except that the registration does not include the LSE and therefore CSP locations may be aggregated by EDC by Transmission Zone instead of current requirements that requires locations to be aggregated by EDC by Transmission zone and by LSE. The LSE will not review this registration.
- 2) If CSP has Economic Regulation registration then Economic registration will only allow locations to participate in energy market.
- 3) If CSP has Economic registration with any certified ancillary service (SR, DASR or Reg) then Economic Regulation registration may not be submitted.
