

Emergency Energy Settlement M&V

Jack O'Neill
12/12/2016
DRS Meeting

- Emergency energy settlements will be based on 3 Daytype with SAA method unless there is an economic registration. If there is an economic registration then that CBL will be used (unless it is an MBL)
 - CSP will not have to change existing registration
 - PJM will change CBL from “hour before” to “3 daytype with SAA”
 - If we have an event eLRS will calculate CBL for settlements as needed
