

Comprehensive Review of Demand Response Training Material and Courses

Demand Response Subcommittee
Shane Watts and Andrea Yeaton
January 30, 2019

- Demand Response has gone through a lot of changes in the past few years
 - Products introduced and retired
 - Capacity Performance
 - M&V changes
 - New DR Hub system
- Time to do a comprehensive review of training material and courses that are offered to make sure they're up-to-date and meet the needs of our members
- Need input from members

- Training slides split into 3 areas:
 - Load Management
 - Overview
 - Registrations
 - Energy
 - Ancillary Services
- Training courses:
 - Load Management Registrations
 - Demand Response (all aspects)
- Certification Courses:
 - Ancillary Services
 - Load Management

- Course considerations:
 - **Format** – just theory, how/where to accomplish task, hands-on DR Hub exercises, hands-on calculations
 - **Length** – 2 hour chunks by Webex, all day class in person, 2 day class in person
 - **Depth of material** – for a new person, for an experienced person
 - **Continuing Education Hours (CEH)**
 - Value of **CSP certification**

PJM will be sending out a training survey to get member input

Your thoughts on DR training needs.....
