

# 2022/2023 Load Management Registration Process Deadlines and Summer Operational Readiness

Andrea Yeaton, Senior Operations Analyst II

Demand Response Subcommittee

April 7, 2022

- 2021/2022 Capacity Performance Registration Testing
- Remaining 2022/2023 Registration Timeline
- 2022/2023 Expected Reduction Reporting
- Load Management Dispatch procedure reminder

- Testing of 2021/2022 CP LM Registrations must be scheduled and completed by Friday, May 31, 2022 at 22:00 (EPT)
- Test/retest event Confirmation and Data Submission window opens in DR Hub on June 1, 2022
  - You must go into DR Hub to confirm and provide data for your test/retest event(s) by 23:59 (EPT) on July 15, 2022
- Test Penalty charges will be in the August bill (comes out in September)

- May 1, 2022 Mass Market template due
- May 16, 2022
  - The last date to submit new Load Management (LM) registrations
- May 14-31, 2022
  - Resubmission can be made only for data errors on original submission
    - Resubmitted registrations must be in Confirmed status before June 1 or will be withdrawn
  - As always, any registration that is **Denied** or **Terminated Due to Duplicate**, must use Resubmission feature. DO NOT create a new registration. This maintains the original submission date.
- May 31, 2022 at 23:50 EPT
  - Any LM registrations not in Confirmed status will be withdrawn by PJM
    - IMPORTANT Denials and Duplicates must be resolved by this time
  - LM registrations must be linked to an RPM/FRR DR Resource
  - LM registrations must have Completed checkbox ticked

**DO NOT check Completed box until 100% sure there will be no more changes**

# Fields that can be edited after Status is Confirmed

Field value can be changed:	Completed Checkbox Status	
	Before Checked	After Checked
•Measurement Method	Yes	No
•Summer Managed Load	Yes	No
•Summer Only	Yes	No
•Winter Peak Load	Yes	No
•Winter Managed Load	Yes	No
•Product	Yes	No
•MOPR DR Load	Yes	No
•RPM DR Resource	Yes	No
•Resource Type	Yes	Yes
•Lead Time	Yes	Yes
•Strike Price (only Load Management DR Full)	Yes	Yes
•Shut Down Costs (only Load Management DR Full)	Yes	Yes

# Resources linked to Registrations Report (Use this report to determine your Capacity Position)

Reports

- Tasks
- Locations
- Registrations
- Events
- Meter Data
- Energy Settlements
- Compliance
- Dispatch Groups
- Account and Users
- Reports**
- RERRA

- Resources Linked To Registrations**
- DR Registration Orphan Report

Resources Linked To Registrations Report - 2021/2022

- a) Negative MW means shortfall and will be assessed daily deficiency penalty.
- b) Excess means amount nominated is greater than RPM commitment.
- c) All penalties are in UCAP, Resource Names are RPM resources - go to Capacity Exchange to see specifics.
- d) Difference Summer MW equals Total Summer ICAP (MW) minus Summer Committed MW (ICAP).
- e) Difference Annual MW equals Minimum of Total Summer MW (ICAP) and Total Winter MW (ICAP) minus Annual Committed MW (ICAP).

CSP

Export: [CSV](#)

CSP	Product	Resource Name	Zone	Resource ID	Summer Committed MW (ICAP)	Annual Committed MW (ICAP)	Reg ID	Customer Name	Summer ICAP (MW)	Winter ICAP (MW)
	Capacity Performance DR		AEP		4.3	4.3			2.400000	2.400008
									1.900001	1.900001
								<b>Total MW</b>	<b>4.3</b>	<b>4.3</b>
								<b>Difference Summer MW</b>	<b>0.0</b>	
								<b>Difference Annual MW</b>		<b>0.0</b>

# DR Registration Orphan Report

(Use this report to make sure all your registration are linked to Capacity Exchange Resource)

Resources Linked To Registrations DR Registration Orphan Report

CSP

**DR Registration Orphan Report - 2021/2022**  
 (DR Registrations that have not been linked to an RPM Auction Resource in DR Hub)

Export: CSV

CSP	Product	Zone	Reg ID	Customer Name	Summer ICAP (MW)	Winter ICAP (MW)
	Capacity Performance DR	ATSI			3.404760	
	Capacity Performance DR	DOM			3.460574	2.838807
	Capacity Performance DR	DPL			0.242100	0.297104
	Capacity Performance DR	PEPCO			3.344250	4.166601

- CSPs must report best estimate of hourly load reduction capability by Zone, Resource Type, Product and Lead Time
  - i.e. PECO, Pre-Emergency, Capacity Performance, Quick Lead Time, 25,500 kW
    - If sites are closed (i.e. July 4 week shut down), then use zero (0) expected load reduction
    - If sites are operating at lower consumption than normal, then use that lower expected load reduction
- These values are expected energy reduction values
  - Not necessarily Nominated ICAP values
  - Not used for compliance calculations
- The data are used by Control Room operators when making LM event dispatch decisions
- Expected Reduction estimates for June are due Tuesday, May 31
- Reduction estimates based on new 2022/2023 registration portfolio

- Primary Communication Channel – Web Service Electronic Notification from DR Hub
  - Secondary Communication Channels – for informational purposes or if there is a PJM issue with primary notification channel
    - Required: PJM All-Call (telephone message)
    - Optional: Emergency Procedures website
    - Optional: DR Hub may send a courtesy email to CSPs with an Email Preference of “All Tasks and Dispatches” or “All Dispatches”

- Using a defined web service protocol, each CSP polls DR Hub once per minute (24/7) with a request for dispatch instructions
  - In response DR Hub provides registration specific dispatch instructions
- Instructions contain the correct start time of event, even in no-notice and shortened-notice situations (i.e. DARA)
- CSPs communicate the instructions to their end use sites to perform actual load reductions

## Sample All Call Messages

### Pre-Emergency Load Management Event Notification:

- *“This is (name) with an emergency procedures message. As of (state notification time) PJM has initiated a Pre-Emergency Load Management Event. CSPs should reduce load based on DR Hub dispatch instructions. See Emergency Procedure message on PJM.com for details. This is (name) that is all.”*

### Emergency Load Management Event Notification:

- *“This is (name) with an emergency procedures message. As of (state notification time) PJM has initiated an Emergency Load Management Event. CSPs should reduce load based on DR Hub dispatch instructions. See Emergency Procedure message on PJM.com for details. This is (name) that is all.”*
