

**Load Analysis Subcommittee**  
**Teleconference / Web conference**  
**Wednesday, September 16, 2015**  
**1:30 p.m. – 4:00 p.m. EPT**

## Administration

1. Mr. Reynolds opened the meeting and reviewed the agenda. Ms. Mooney performed roll call.
2. The Load Analysis Subcommittee reviewed the draft minutes from the September 2, 2015 meeting. It was noted that minutes were longer and more detailed than needed. PJM will check with Member Services about the amount of detail to include.

## Load Forecast Model Development

Mr. Gledhill reviewed recent load forecast model developments including the incorporation of EDC-supplied zonal saturation data, the forecast distribution using the new model specification, and the effects of shortening the estimation period in the model.

PJM also noted that along with meeting materials there were posted files that include model statistics, a definition guide for variables, and a spreadsheet showing the steps to construct the equipment index.

Ms. Cummings updated the subcommittee on the work being done to include annual BTM solar additions to the forecast. A method to back-cast historical solar values was discussed. PJM is also working with IHS Energy for a method to forecast future solar additions.

Mr. Reynolds noted that PJM is entering into its normal forecast update schedule and that another Load Analysis Subcommittee meeting will not be scheduled until a preliminary 2016 forecast is ready to be reviewed, likely in November.
