

A Review of PJM RTO Summer 2018 Loads

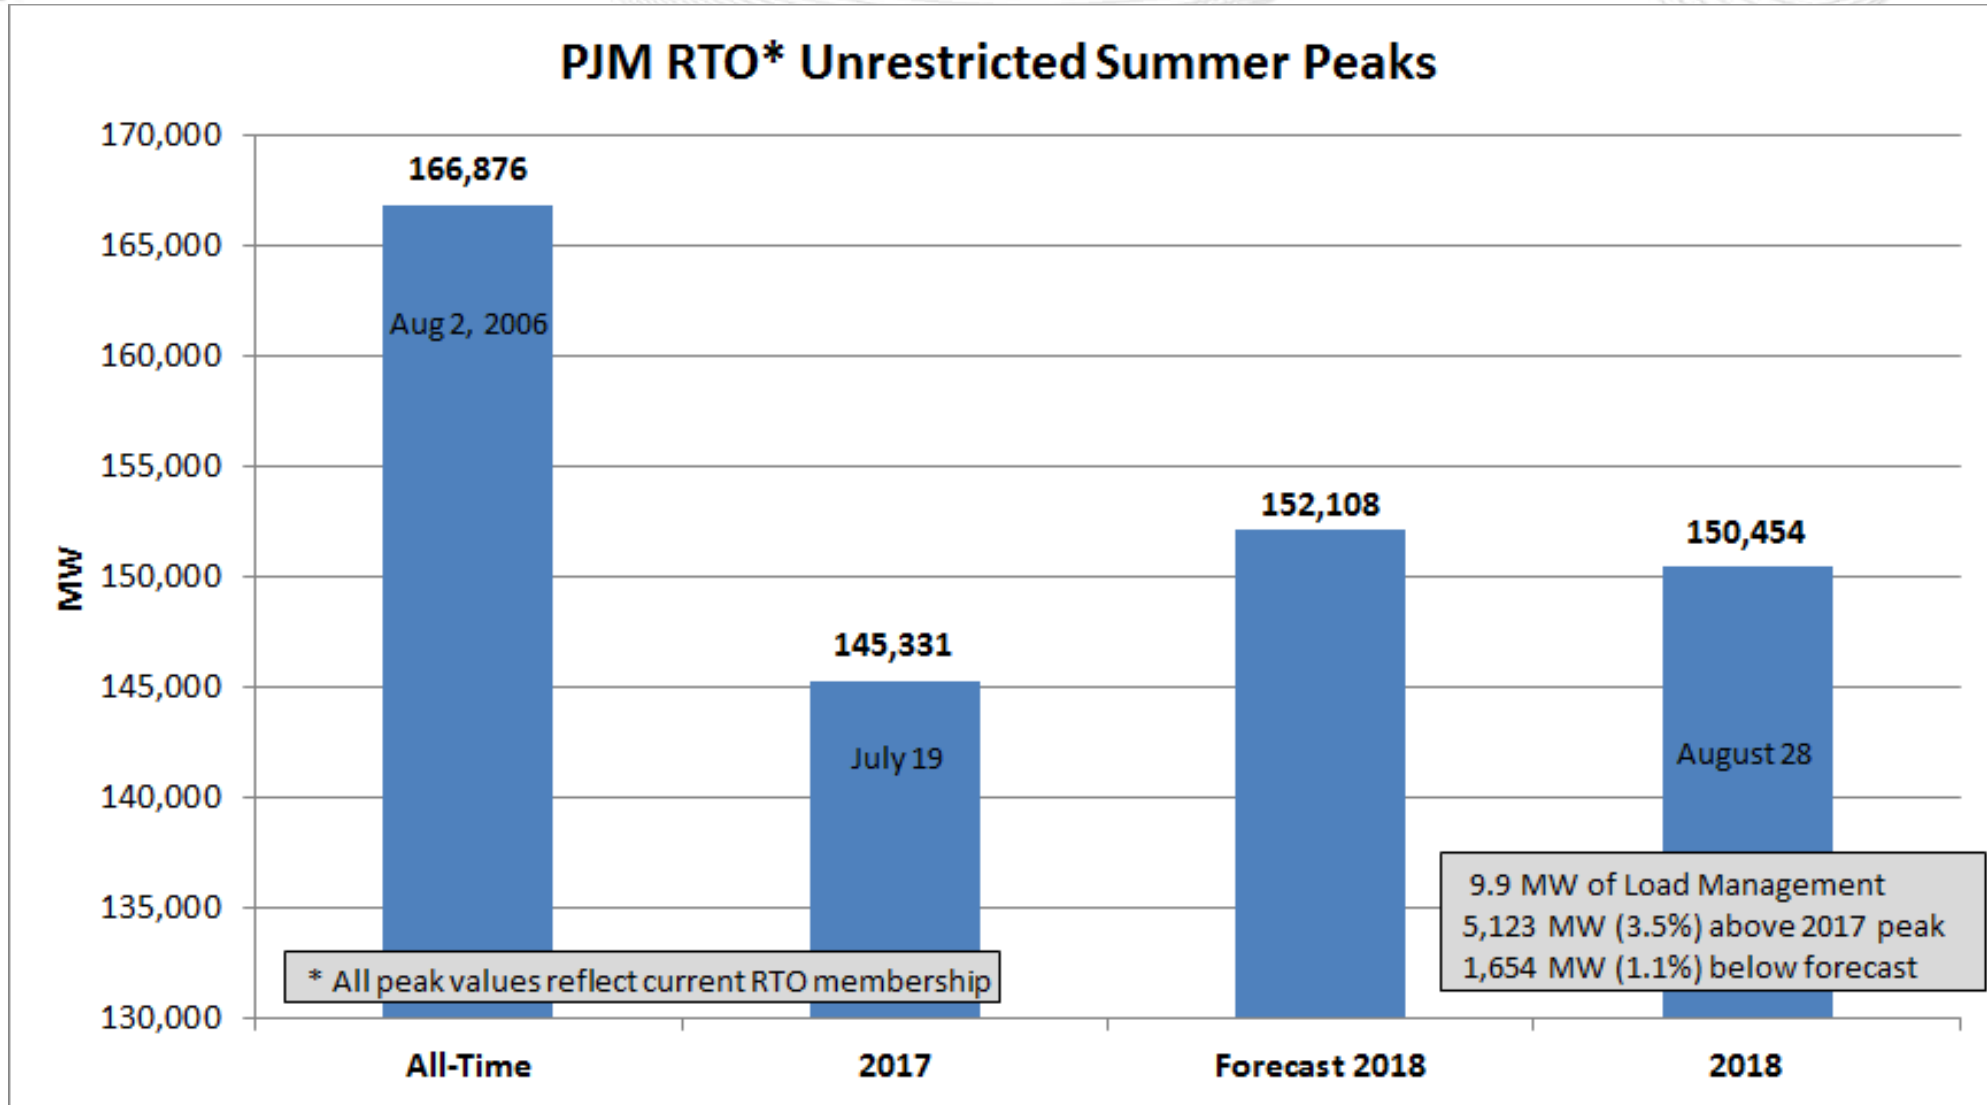

Joseph Tutino
Engineer – Resource Adequacy Planning
Load Analysis Subcommittee
November 27, 2018

- Peak load was above previous year but below forecast.
- No PJM-declared Load Management events.
- Weather: RTO Peak day heat index was milder than 50/50; 3 zones (AE, DPL, PECO) had max Heat Index higher than median, others roughly normal.
- Peak diversity for Summer 2018 was 3.3%.
- Zone Peaks:
 - June: 3, on 6/18
 - July: 6, on two different days
 - August: 3, on 8/29
 - September: 9, on three different days
 - Only 8 zones peaked on a 5CP day
- The RTO peaked on August 28; no zones peaked on that day.
