1. Administration

PJM reviewed the Anti-Trust Policy, Code of Conduct and Media Participation Policy and performed roll call. The Subcommittee approved the minutes from the April 22, 2014 MSS meeting.

2. Problem Statement for Emergency Load Response Billing

Mr. Dan Westin, City of Rochelle, reviewed a problem statement on the impact of load reconciliation data on the allocation of Emergency Load Response Charges. The Subcommittee discussed the background on the proposed problem to be addressed. PJM asked to add consideration of reconciliation data in Emergency Energy Charge Allocations to the problem statement. There was no opposition from the Subcommittee to pursue this problem statement.

3. Power Meter and InSchedule Deadlines

Mr. Ray Fernandez, PJM, reviewed the results of the survey on proposed packages. The survey indicated that none of the packages have more than 50% support. One package, Package G, was identified as having minimal support and the group agreed it could be removed from further consideration. The group discussed each of the packages that garnered the most first and second choice votes and decided a further poll to determine support of the individual design components that are achievable in the shorter term (extension of InSchedule/Power Meter submission deadlines, extension of Monthly Meter Correction deadlines, and reconciliation of Balancing Operating Reserve Deviations) would be more informative.

The subcommittee will continue to discuss longer term components in future meetings.

PJM will issue a poll prior to the June meeting to determine support of the short term design components.

4. Capacity Peak Load Contribution (PLC) Charge Reconciliation

Ms. Susan Kenney, PJM, reviewed the results of the polling survey. The majority of respondents (78%) were in favor of the proposed extension to allow for corrections of PLC and NSPL data. Ms. Kenney informed group that PJM Legal counsel confirmed RAA changes will be required in the event the proposal is approved by subsequent committees.

PJM will bring the proposal to the June 4, 2014 Market Implementation Committee meeting for consideration.

5. 2014 Power Meter/InSchedule Holiday Deadlines

Mr. Ray Fernandez, PJM, reviewed the results of the 2014 holiday deadline survey. The majority of respondents (69%) favored the existing holiday deadlines. As a result, the deadlines will remain unchanged.

6. Miscellaneous Settlements Items

Ms. Susan Kenney, PJM, discussed planned updates to the FERC EQR MSRS Report format specific to Capacity reporting. Capacity data will continue to be reported by auction, with the Price and Transaction Charge columns to be updated to represent the product of the Standardized Quantity and Standardized price. Additionally, the Standardized Price will consider the monthly multiplier, rather than Standardized Quantity which currently accounts for the monthly multiplier.

Ms. Susan Kenney, PJM, also informed the subcommittee of a new PJM Tool being developed to allow members to submit Billing Line Item Transfers electronically to PJM. The new tool is slated to be available in the third quarter of 2014. Interested parties may sign up for the Billing Line Item Transfer tool distribution list on the [Newsletters](#) page of PJM.com.

Mr. Ray Fernandez, PJM, informed the group the June MSS meeting was rescheduled to June 25, 2014.

7. Future Agenda Items

Additional suggestions for future agenda items can be sent to mss@pjm.com.
