

MSCS/MSRS Site Switchover

Ray Fernandez
Manager, Market Settlements Development
Market Settlements Subcommittee
November 19, 2018

- As part of PJM's 2018 Evolution of Technology Goal to improve system reliability, Market Settlements has worked with PJM IT staff to develop and build business continuity process for our Market Settlement Calculation System and Market Settlement Reporting System.
- The MSRS and MSCS systems have been duplicated at PJM's Milford site.
- PJM conducted a site switchover for both systems on Thursday, November 8. Both MSCS and MSRS were switched over from Jefferson to Milford in under an hour.

- Running the settlement systems from either Jefferson or Milford is transparent to members, but greatly enhances PJM's Business Continuity Planning to ensure the settlement systems will be fully functional in the event of an issue in one of our data centers.
- PJM plans on executing periodic site switchovers in the future which will result in brief outages to MSRS outside of normal business hours.
