

Manual 28 Biennial Review Summary of Changes

Suzanne Coyne

Principal Consultant, Market Settlement Development

Market Settlements Subcommittee

August 16, 2023

Action Required	Deadline	Who May Be Affected
Communicate Manual 28 updates to impacted staff 	10/23 	PJM Members and Market Participants 

- Grammar, Punctuation, Typos, Syntax Consistency, Reference Updates
- Addition of clarifying words and phrases
- Removal of terminated business rules
- Deletion of duplicate material
- Clarification of business rules for Direct Charging Energy (hybrids and ESRs)

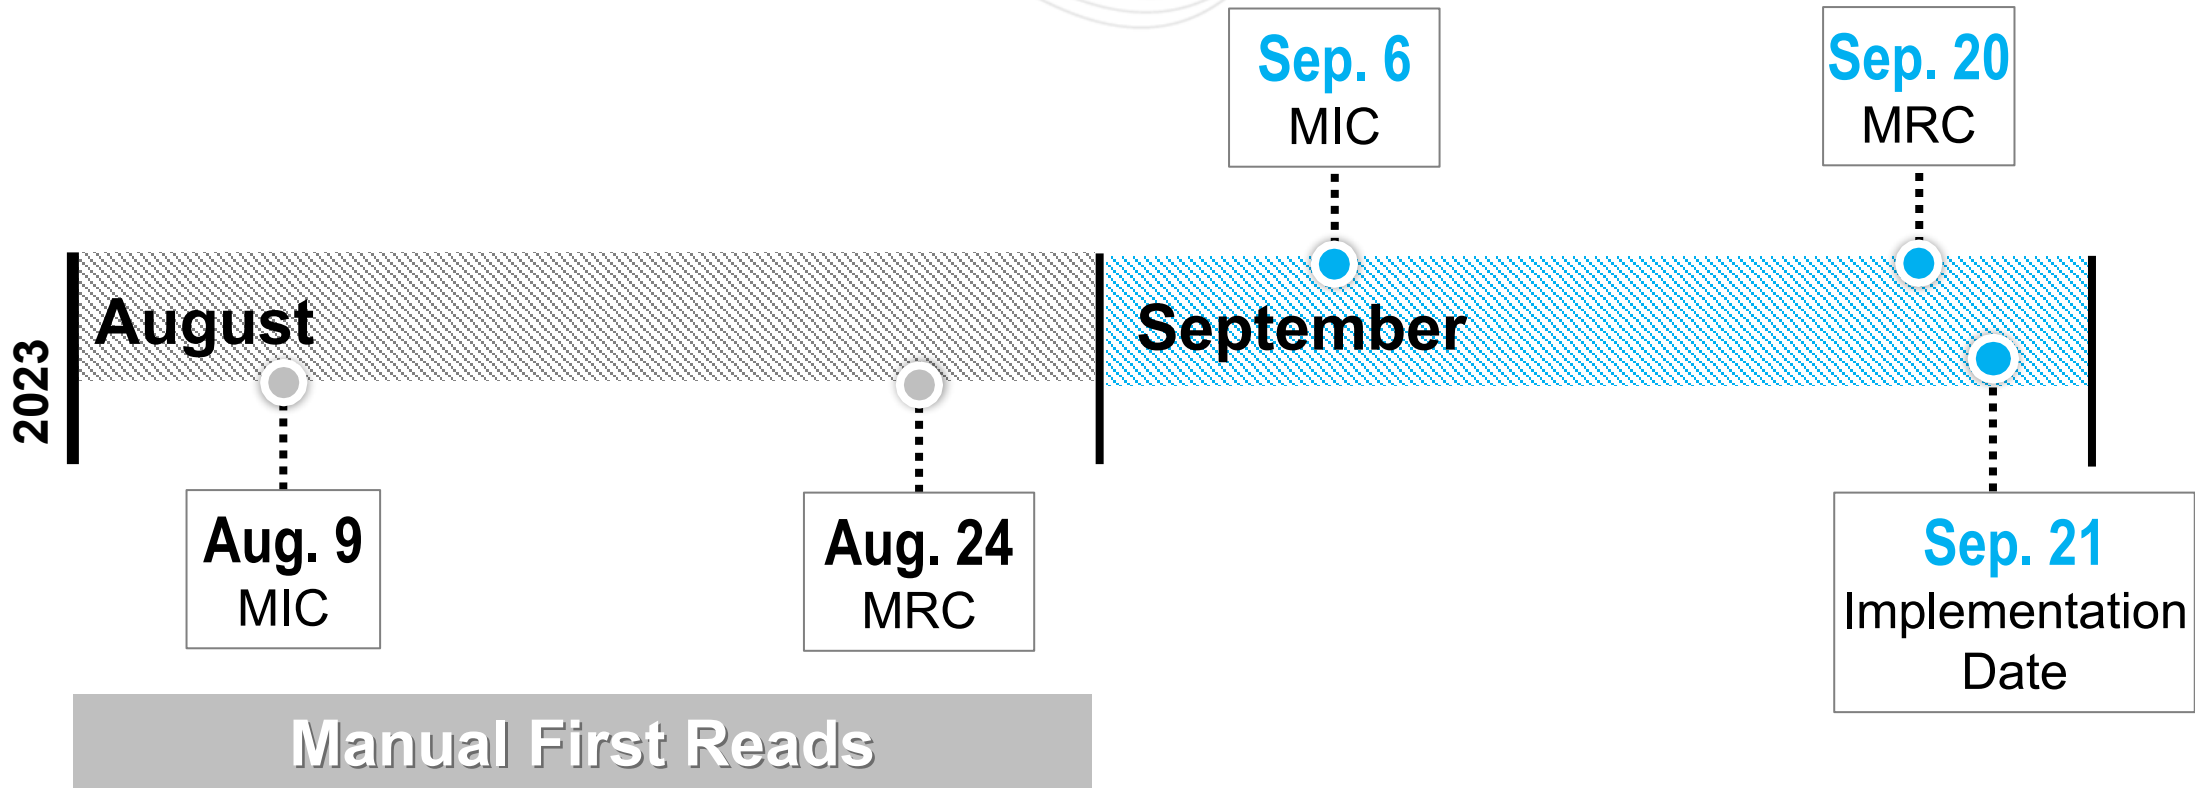

- Section 3 (Spot Market): Consistent use of fully metered EDC, day-ahead, and balancing terminology
- Section 4 (Regulation): Conforming changes for regulation mileage per order EL21-83-000
- Section 5 (Operating Reserves):
 - Replaced UDS basepoint MW with dispatch signal MW
 - Replaced UDS LMP desired MW with Dispatch Imp desired MW
 - Corrected Balancing Operating Reserve Target calculation
 - Including Nuclear unit eligibility description in Section 5.2.1
 - Updated submittal process for condense to generation costs (Submitted via Markets Gateway, not manually submitted)
 - Reformatted balancing energy market value for easier understanding

- Section 5 (Operating Reserves, continued):
 - Removed references to Demand Resources, calculations are covered in Section 11.
 - Added references to Secondary Reserves
 - Added up-to congestion transactions to DA Op Reserves charge denominator
 - Added Section 5.3.2.3A, Calculation of Ramp Limited Desired MW consistent with M11 (will be removed from M11 at a later date).
 - Reworded Section 5.3.5 Reactive Services
- Section 6 (Synchronized Reserves): Clarifications to shortfall MW and charge calculations (e.g. shortfall MW if multiple events during a day and corrected billing line item)

- Sections 6, 7, and 19 (SR, NSR, and SecR): Added obligation calculation details if RT assignments are zero.
- Section 8 and 9 (Transmission Congestion & Losses): Added explicit charge details for up-to congestion transactions.
- Section 9.4 (Transmission Loss Credits): Replaced specific non-firm export reduction factor percentage with calculation description
- Section 11 (Load Response): Replaced description of LM testing allocation ratio with formula
- Section 15 (Market Revenue Neutrality Offset): Corrected cost component of LOC Credit Due to Reduction for Non-Synchronized Reserve

- Section 16 (FTR Auction): Updated to reflect changes allowing self-scheduling by class type
- Section 16 (FTR Auction) and 17 (ARR Settlements): Clarified inclusion of long-term FTR auctions
- Section 17 (ARR Settlement): Added ARR allocation business rule for Direct Charging Energy
- Section 22 (Open-loop Hybrid & Energy Storage): Corrected placement of following dispatch within 10% business rule.
- Section 23: Fuel Cost Policy Penalty Settlements: New section describing settlements methodology consistent with Operating Agreement Schedule 2
