

**Resource Adequacy Analysis Subcommittee  
Conference Call/WebEx  
July 2, 2018  
2:00 p.m. – 3:00 p.m. EST**

## Administration

Mr. Falin opened the meeting and reviewed the agenda. Mr. Quevada performed roll call. The meeting minutes from the October 4, 2018 meeting were approved and will be posted as final.

## 2019 RRS Load Model Assessment

Mr. Rocha-Garrido reviewed detailed results of analysis performed by PJM staff regarding the selection of a load model time period for both PJM and the World regions. The analysis focused on the 2023/2024 Delivery Year and followed the procedure approved by the Planning Committee at its July, 2009 meeting. PJM recommended a 10 year load model based on the years 2003-2012 for use in the 2019 RRS Base Case.

PJM also recommended that the World peak be switched to a different July week so that PJM and World peak on the same month but not on the same week.

The same approach was also used in the 2016-2018 RRS. Following discussion, the RAAS approved the 2003-2012 load model for use in the 2019 RRS Base Case.
