

# Summary of M-03A Rev. 17 Changes

SOS (First Read)

September 6, 2018

Diane Lake, Model Management Dept.

## Overall:

- Section 3.2.1: Clarity added concerning extent of external BES facilities considered for modeling.

## Section 3.2.1 – External Modeling:

### Clarified 3<sup>rd</sup> paragraph:

To determine the extent of external BES equipment to be considered for modeling, a planning case Distribution Factor (DFAX) report is periodically run and reviewed for each external area. The analysis and review identifies all equipment with at least a 3% DFAX. The identified equipment is used to determine the external facilities that may be included in the PJM external model.
