

# System Restoration Coordinator Subcommittee

Thursday February 28<sup>th</sup>

# 2019 Spring Restoration Drill

- 2019 PJM RTO Spring Restoration Drill will take place on Tuesday and Wednesday May 21<sup>st</sup> and 22<sup>nd</sup>
- Member phone checks will be conducted with PJM on Monday May 20<sup>th</sup>
- Alternate dates: May 28<sup>th</sup> – 29<sup>th</sup>

- Reason for moving it to May:
- Spring Seminar had extra weeks added which would have necessitated scheduling the drill late January or early February
- Weather concerns

- Overall PJM received positive feedback from the 2018 Spring Restoration Drill concerning SharePoint
- PJM is in the process of making improvements based on the feedback received from members
- At least 2 weeks prior to the drill PJM will send SRCS Representatives a brief training presentation on SharePoint

PJM is giving TOs the option to start the Drill with a partially restored system. TOs can still start from a total black out condition.

- Most likely PJM will work with TOs to determine where the restoration process will start based off of a point in the restoration plan
  - May be limitations based on PJM simulator
- Let PJM know if you wish to start and how far along by 3/11/19

- Spring Restoration Drill invitations will be issued on Tuesday, April 2, 2019
- For the 2019 PJM Spring Restoration Drill, the invitations will be sent via email and confirmation for participation will be completed via the PJM survey tool
  - The invitations will NOT be issued from LMS, the transition to the new survey tool will allow for a consolidated tool and tracking for all participants
- Invite will be sent to the TO contacts for SRCS and the Generator Operators and System Restoration contacts listed in Resource Tracker.

- TO/GO contact will be requested to click on the survey tool link to confirm participation.
  - Participation: Yes or No
  - Alternate phone number for participation
    - (real time desk will be used as default)

- Contact will receive confirmation message for participation after survey is completed AND confirmation email
- The confirmation email will include a link to the Drill Information Packet

### Submit Update

Rest Plan:  [Browse...](#)

Date submitted to PJM for approval (must be 30 days prior to Effective Date for the Annual Update)

PJM approval indicates that the plan has been reviewed and accepted and is compatible with the RC restoration plan and other TO Restoration Plans as per EOP-006, R5.1. Any required changes are communicated to plan owner. The PJM approval will be provided via the eDART tool.
