Miscellaneous Matrix Revisions for Aug 7 CCSTF

Andrew Levitt, Market Design and Economics Department

August 7, 2020

- **Design Component 1-Classes-Limited Duration and also Combination-Soln A**

  – Clarify the required inventory for black start commitments.

  – Added that resources cannot switch classes more often than once every five years.

- **Design Component 4C-Functional Application of ELCC**

  – Add principles for case-by-case handling of resources with behind the meter firm commitments and resources that sell resource adequacy outside of PJM.

  – Clarify treatment of resources that choose not to sell all their Accredited UCAP.

  – Add: "All resources that are expected to offer into the Capacity Market for a given delivery year are modeled as providing Capacity, whether or not they are expected to clear."

- **Design Component 6-Combination Resources-Soln F** - Change the streamflow metric for hydro with storage to 24-hour rolling average of hourly streamflow (instead of monthly average of hourly streamflow).
