

Intelligent Reserve Deployment Proposed Timeline

Michael Zhang
Sr. Engineer, Markets Coordination
SRDTF
September 22, 2021

- Initial phase of 6 to 12 months to start in Feb/March 2022.
 - IRD initiated deployments with updated basepoints
 - New performance evaluation
 - Ensure proper event recovery is achieved
 - Adjust inputs and parameters based on performance
 - Collect data on results to make informed decisions on path forward
- Necessary governing document and manual changes.

- Reconvene SRDTF towards the conclusion of initial phase.
 - Review performance metrics
 - Solicit feedback on IRD experience
 - Adjust and finalize deployment approach
 - Reflect updates in governing documents and manuals
- Timing dependent on number of SR deployment events and recovery performance.

- 5-min dispatching and pricing long-term changes.
 - IRD based on status quo
 - Further analysis to determine if changes will be applied to IRD
- Reserve Price Formation/ORDC changes.
 - IRD designed with changes in mind and should work in conjunction
 - Starting initial IRD phase earlier to help quantify impacts
- Phased IRD approach will allow for adjustments based on analysis of impact.
