

Changes found in the September 2022 DR Hub XSD release are shown below.

Note: All users should (at a minimum) be at the March 2022 release level by September 31, 2022. Items included in this release will not be available to implementations using a prior release.

Prior to updating or replacing any XSD, backup existing versions of the current XSD and any in-house changes you've made prior to this release.

It is advisable to perform a file comparison between the XSD you are using today and the XSD you are migrating to.

Please verify all changes prior to implementation.

The September 2022 XSD changes are as follows:

Additions to Existing types are shown in green. Items removed are shown in red where applicable.

```
<xs:complexType name="registrationEnergyType">
  <xs:sequence>
    <xs:element name="secondaryReserve" type="xs:boolean" minOccurs="0"/>
    <xs:element name="srSCADATestedAndVerified" type="xs:boolean"
  </xs:sequence>
</xs:complexType>

<xs:complexType name="eventSummaryInfo">
  <xs:sequence>
    <xs:element name="secondaryReserve" type="xs:boolean" minOccurs="0"/>
  </xs:sequence>
</xs:complexType>

<xs:simpleType name="registrationFieldEnum">
  <xs:restriction base="xs:string">
    <xs:enumeration value="REG_SECR_SCADA_TEST_FLAG"/>
  </xs:restriction>
</xs:simpleType>
```

End of Change List
