

Deactivation Request Grand Ridge IV Battery

Ahead of the 6/30/2024 deadline to decommission as early as 10/1/2024, I'd like to formally request deactivation of Grand Ridge IV Battery. As a refresher, this project is located at 2192 E. 25th Rd. Marseilles, IL 61341 and is a 4.5 MW battery facility, composed of one Aggreko container (1.5 MW; Lithium Titanate) and two ATL containers (1.5 MW/each; Lithium Iron Phosphate). The entire project has been and is currently out of the market and will be retired as is it not expected to return to service.

Please note again that we do not wish to deactivate the GRIV Wind project. These are two separate projects under a similar Market Participate name, but we only wish to deactivate the 4.5 MW battery portion (Project/OASIS ID: y2-043).

We would like to request a formal deactivation date of 10/1/2024. Please let me know if you have any questions and thank you in advance for your help!

Best,
